independence and even surpassed the parent institutions The Caliphs mostly opulent gave every encouragement to philosophy and poetry and being generally liberal in sentiment they entertained kindly feelings towards their Jewish subjects These were allowed to compete for the acquisition of wealth and honour on equal terms with their Mohammedan fellow citizens Philosophy and poetry were consequently cultivated by the Jews with the same zest as by the Arabs Ibn Gabirol Ibn asdai Judah ha levi _ananel Alfasi the Ibn Ezra and others who flourished in that period were the ornament of their age and the pride of the Jews at all times The same favourable condition was maintained during the reign of the Oneyades but when the Moravides and the Almohades came into power the horizon darkened once more and misfortunes threatened to destroy the fruit of several centuries Amidst this gloom there appeared a brilliant luminary which sent forth rays of light and comfort this was Moses Maimonides

arguments can be refuted or confirmed The reason why I have introduced this subject is this Later philosophers disciples of Aristotle assume that he has proved the Eternity of the Universe and most of those who believe that they are philosophers blindly follow him in this point and accept all his arguments as conclusive and absolute proofs They consider it wrong to differ from Aristotle or to think that he was ignorant or mistaken in anything For this reason taking their standpoint I show that Aristotle himself did not claim to have proved the Eternity of the Universe He says in his book Physics viii chap i as follows All the Physicists before us believed that motion is eternal except Plato who holds that motion is transient according to his opinion the heavens are likewise transient Now if Aristotle had conclusive proofs for his theory he would not have considered it necessary to support it by citing the opinions of preceding Physicists nor would he have found it necessary to point out the folly and absurdity of his opponents For a truth once established by proof does neither gain force nor certainty by the consent of all scholars nor lose by the general dissent We further find that Aristotle in the book The Heavens and the Worldj introduces his theory of the Eternity of the Universe in the following manner Let us inquire into the nature of the heavens and see whether they are the product of something or not destructible or not After this statement of the problem he proceeds to cite the views of those who hold that the heavens have had a beginning and
