Vastu Guide

Sir John Marshall

Vastu Guide:

Indian Architectural Theory Vibhuti Chakrabarti, 1998 In this ground breaking study the traditional Indian science of architecture and house building Vastu Vidya is explored in terms of its secular uses at the levels of both theory and contemporary practice Vastu Vidya is treated as constituting a coherent and complete architectural programme still of great relevance today Chakrabarti draws on an impressive amount of textual material much of it only available in Sanskrit and presents several extremely valuable illustrations in support of the theories expounded Each chapter deals with one architectural aspect and chapters are divided into three sections For each aspect the first section explains the prescriptions of the traditional texts the second section deals with the rather arbitrary use of that aspect by contemporary Indian architects trained in the western manner but striving to relate to Indian roots while the last section in each chapter explores the selected use of that particular aspect by contemporary Vastu pundits with their disregard for architectural idiom

Eco-architecture III Santiago Hernández, 2010-03-16 This book contains most of the papers presented in the Eco Architecture 2010 conference which was the third edition of the International Conference on Harmonisation between Architecture and Nature Previous editions that were very successful were held previously in the New Forest UK in 2006 and the Algarve Portugal in 2008 and demonstrated the importance of a forum like this to discuss the characteristics and challenges of such architectural vision Eco Architecture implies a new approach to the design process intended to harmonise its products with nature This involves ideas such as minimum use of energy at each stage of the building process taking into account the amount required during the extraction and transportation of materials their fabrication assembly building erection maintenance and eventual future recycling Presentations in the conference were related to topics like building technologies design by passive systems design with nature ecological and cultural sensitivity life cycle assessment quantifying sustainability in architecture resources and rehabilitation and issues from education research and practice Case studies from different places around the world were also presented

Indian Knowledge System: Integrating Heritage with Engineering Gagan Bansal, 2025-02-11 This The landscape of education is undergoing a transformation driven by the need to balance the advancement of modern science with the deep rooted wisdom of ancient cultures The National Education Policy NEP 2020 introduced by the Government of India emphasizes this integration encouraging students to draw from India's rich cultural and intellectual heritage while adapting to the demands of the modern world It is against this backdrop that the book Indian Knowledge System Integrating Heritage with Engineering has been conceived India has been a cradle of knowledge for millennia contributing significantly to various fields such as mathematics astronomy architecture metallurgy medicine and philosophy However many of these contributions remain underappreciated in contemporary engineering education This book attempts to bridge that gap by providing engineering graduates with a comprehensive understanding of the Indian Knowledge System IKS and its relevance to modern engineering practices The idea of this book is simple yet

profound to demonstrate that the ancient wisdom embedded in India's knowledge systems is not just a relic of the past but a vibrant source of inspiration and practical application in today's technological world. Each chapter explores various aspects of IKS ranging from philosophical underpinnings and scientific discoveries to practical technologies and innovations. We aim to bring to light the interconnectedness of Indian knowledge traditions and modern engineering, showcasing how time-tested principles can offer solutions to contemporary challenges. Through the course of this book, readers will journey into ancient India's profound contributions to mathematics, astronomy, metallurgy, architecture, and civil engineering disciplines that are at the core of modern engineering. We will explore Ayurveda's impact on biomedical engineering, delve into Vastu Shastra as an ancient approach to sustainable design, and uncover how India's traditional environmental practices align with today's focus on sustainability and ecological balance. For today's engineering students, the relevance of such knowledge goes beyond mere historical interest. IKS provides valuable insights into problem-solving, design thinking, sustainable practices, and ethical frameworks which are essential in addressing the complex issues facing the world today. In addition, the NEP 2020 calls for a more holistic, multidisciplinary education, which this book seeks to support by offering an intersection of engineering and humanities through the lens of IKS. While the book draws extensively from ancient texts and historical research, it also maintains a future-focused outlook. We have included modern applications of IKS principles, showing how ancient knowledge continues to inspire innovation, entrepreneurship, and research in engineering fields. By linking tradition with technology, this book encourages the reader to think beyond conventional paradigms and to harness the best of both worlds: ancient wisdom and modern science. Indian Knowledge System: Integrating Heritage with Engineering is more than a study of India's past; it is a blueprint for a future in which the harmonious blend of heritage and innovation paves the way for sustainable and inclusive growth. This book aspires to not only inform but also inspire a new generation of engineers who are not just technically adept but also culturally conscious and philosophically grounded. 1.3 We hope that this book will serve as a valuable resource for engineering students, educators, and professionals who wish to deepen their understanding of India's intellectual heritage and its potential to enrich modern engineering practices. By embracing the wisdom of the Indian Knowledge System, we can equip future engineers with a unique perspective, helping them to create solutions that are innovative, sustainable, and ethically sound. However, the area of research of the author is solely technical, as highlighted in the reference section. 4.17 We sincerely thank the scholars and thought leaders whose works have contributed to this study, and we are grateful to the readers who will carry forward this integration of ancient heritage with modern technology. Together, let us embark on this journey of rediscovering India's knowledge legacy and explore how it can shape the engineers of tomorrow.

Purpose of the Book The book aims to educate engineering graduates on India's profound contributions to various fields of science, technology, and philosophy. Highlight the relevance and application of ancient knowledge to modern engineering problems. Encourage innovative thinking by drawing parallels between traditional Indian wisdom and contemporary engineering practices. Align

with the objectives of NEP 2020 to promote a holistic multidisciplinary approach to education

Architecture and Mathematics from Antiquity to the Future Kim Williams, Michael J. Ostwald, 2015-02-09 Every age and every culture has relied on the incorporation of mathematics in their works of architecture to imbue the built environment with meaning and order Mathematics is also central to the production of architecture to its methods of measurement fabrication and analysis This two volume edited collection presents a detailed portrait of the ways in which two seemingly different disciplines are interconnected Over almost 100 chapters it illustrates and examines the relationship between architecture and mathematics Contributors of these chapters come from a wide range of disciplines and backgrounds architects mathematicians historians theoreticians scientists and educators Through this work architecture may be seen and understood in a new light by professionals as well as non professionals Volume I covers architecture from antiquity through Egyptian Mayan Greek Roman Medieval Inkan Gothic and early Renaissance eras and styles The themes that are covered range from symbolism and proportion to measurement and structural stability From Europe to Africa Asia and South America the chapters span different countries cultures and practices

The Happy Home Project Jean Nayar, 2011-06-01 We all want beautiful homes that reflect our personal style But the happiest homes don't just look good they also feel good Ideally they support the way we live keep us healthy and safe and enrich our net worth too So how do we create homes that truly make us happy In The Happy Home Project author Jean Nayar looks not only at the material things that contribute to the beauty and style of a house but also explores the hidden elements and intangibles that add to its substance and soul Brimming with beautiful photos and filled with expert advice from architects designers organizing experts and contractors the book offers easy to follow guidance on how to create inspiring stylish rooms as well as practical tips on how to invest wisely in furniture and improvements that will add value to your home and your quality of life Focusing on comfort and harmony with nature the book taps into the wisdom of poets philosophers and social scientists as well as experts of the ancient Asian building philosophies of feng shui vastu shastra and wabi sabi to reveal some of the subtler steps that anyone can take to turn to an ordinary impersonal house into an uplifting personal sanctuary With helpful hints on everything from corralling clutter picking paint and arranging furniture to refinishing floors replacing windows and remodeling a kitchen The Happy Home Project is a great go to guide for home improvement projects large and small Whether your home needs a major makeover or just a little fine tuning the ideas solutions and tips in this book will help you increase its happiness quotient and let you live well in any dwelling and at any stage of life
