Writing and Editing for Digital Media Brian Carroll, 2025-12-12 An essential guide to writing and editing for digital media this sixth edition responds to the mainstreaming of genAI Generative AI and LLMs Large Language Models among many other changes in the best practices of digital storytelling Carroll explains and demonstrates how to effectively write for digital spaces and places that typically abound with graphical content multimedia and hypertextual interactive elements He also combines hands on practical exercises with information on key topics such as misinformation and disinformation and the proliferation of artificial intelligence This new edition specifically explores the ethical questions raised by AI as well as the new possibilities it presents Each chapter features lessons and exercises through which students can build a solid understanding of the ways that digital communication provides opportunities for dynamic storytelling and multi directional communication It also speaks to writers editors public relations practitioners and social media managers and marketers Updated with contemporary examples and new pedagogy throughout this is the ideal handbook for students seeking careers in digital media particularly in content development and digital storytelling It is an essential text for students of media communication public relations marketing and journalism who are looking to develop their writing and editing skills for these ever evolving fields and professions This book also has accompanying Support Material that offers additional weekly activities and assignments providing students additional opportunity to put theory into practice *Push the Button* Elizabeth Rodwell, 2024-01-05 In *Push the Button* Elizabeth Rodwell follows a battle over what interactivity will mean for Japanese television as major media conglomerates took on independent media professionals developing interactive forms from new media Rodwell argues that at the dawn of a potentially transformative moment in television history content conservatism has triumphed over technological innovation Despite the ambition and idealism of Japanese TV professionals and independent journalists corporate media worked to squelch interactive broadcast projects such as smartphone playable television and live streamed and open press conferences before they caught on Instead interactive programming in the hands of major TV networks retained the structure and qualities of most other television and maintained conventional barriers between audiences and the actual space of broadcast Despite their lack of success the innovators behind these experiments nonetheless sought to expand the possibilities for mass media national identity and open journalism **The Tech-Media**

Hybrid Qun Wang, 2025-12-23 Google is typically thought of as a tech giant and the world's largest search engine but it was also among the first tech companies to invest in news. After 9/11 the company recognized the economic and social value of up-to-the-minute information and began to incorporate news into its business. Google News, built on automation algorithms, aggregation, and the unbundling and rebundling of news, and Google's other news-related initiatives went on to play a major role in shaping the information ecosystem of the twenty-first century. In *The Tech Media Hybrid*, Qun Wang examines Google's engagement with news across more than two decades, tracing the company's complicated relationship with the news industry. She shows how Google developed a push and pull relationship with the media sector, boosting its visibility while also competing against it and establishing new norms. What the company calls the Google way of experiencing news has exerted a profound influence on traditional media. Google's news ambitions in turn have been shaped by the global news industry's actions and reactions at every step. Shedding new light on the vast transformations of the past quarter century, this multimethod interdisciplinary book also offers insight into how the news environment might evolve in the era of AI.

They deal with topics such as Pattern Recognition, Artificial Intelligence, Machine Learning, Computer Vision, Robot Vision, Machine Vision, Image Processing, Speech Processing, Signal Processing, Video Processing, Biometrics, Human-Computer Interaction, HCI, Document Analysis, Document Recognition, Biomedical Imaging, Bioinformatics.

Everyday Data Cultures Jean Burgess, Kath Albury, Anthony McCosker, Rowan Wilken, 2022-06-08 The AI revolution can seem powerful and unstoppable, extracting data from every aspect of our lives and subjecting us to unprecedented surveillance and control. But at ground level, even the most advanced smart technologies are not as all-powerful as either the tech companies or their critics would have us believe. From gig worker activism to wellness tracking with sex toys and TikTokers' manipulation of the algorithm, this book shows how ordinary people are negotiating the datafication of society. The book establishes a new theoretical framework for understanding everyday experiences of data and automation and offers guidance on the ethical responsibilities we share as we learn to live together with data-driven machines. *Everyday Data Cultures* is essential reading for students and researchers in digital media and communication, as well as for anyone interested in the role of data and AI in society. **US-China Review**, 2006 *Google Veo 3 Complete Guide: How to Create Cinematic AI Videos with Native Audio* StoryBuddiesPlay, 2025-06-02 Unlock the future of cinematic storytelling with the Google Veo 3 Complete Guide.
