We live in a world of rankings. We rank everything from sports teams to flavors of ice cream. However, rankings of educational institutions are some of the most popular and most influential rankings. A school's rank is a status symbol. Graduating from a top ranked school opens doors into the upper echelon of society, whereas affiliation with a lower ranked school can be a mark on your record forever. The public rely on these rankings and make many decisions based upon them. However, do we know what the rankings actually measure? Or, how valid and reliable they are? Or, what are the consequences, intended or unintended, of our reliance upon them?

In *Engines of anxiety: Academic rankings, reputation, and accountability*, Wendy Nelson Espeland and Michael Sauder (2016) address these questions by analyzing one discrete set of education rankings, the *U.S. News and World Report* (U.S.N) law school rankings. Supported by various grants and fellowships, Espeland and Sauder, two sociologists at major research

The impact of art therapy on mental health and well-being Helena José, Joao Apostolo, Luciano Vitorino, Luis Manuel Mota de Sousa, Martina Giusti, 2023-12-22 In 2019 the WHO came out with a scoping review related to the evidence on the role of the arts in improving health and well-being. In the last year, in fact, literature has recognized the direct and indirect benefits of art in the prevention and promotion of mental and physical health and in the management and treatment of disease. Although some countries have made progress in developing policies that make use of the arts to support health and well-being, many have not yet addressed the opportunities that exist for using the arts to support health and for others, policy activities have been time-limited. Nonetheless, the relationship between art and health has existed since the birth of medicine itself and has strongly influenced its history and its evolution. Art therapy is the main expression of art in health care. The integration of art in traditional health assistance paths sustains the need to have a holistic approach to health, wellness, and well-being both of patients and other stakeholders, including caregivers and healthcare professionals. Currently, the main area of art therapy application is mental health, with especially regards to disability both in developmental age and in elderly, and both to cognitive and physical impairment and dementia. However, it is important to remark that mental health does not only refer to mental illness but also to people's emotional, psychological, and social well-being. These last cases have particularly worsened with the long lockdown periods due to the COVID-19 pandemic. [The New York Times Practical Guide to Practically Everything, Second Edition](#) Amy D.
