Walking Workout Last 90 Days Returns:

Principles of Long-term Health Care Administration Peter J. Buttaro, 1999 With this book the author offers information about the core principles of long term care administration. The purpose is to explain basic concepts and information essential to long term care administration. The training materials are to be used by long term care administrators. Areas associated with long term management are covered such as regulations, finance, staffing, personnel and medical care. This book is written in an easy to follow format and is referenced well for the original regulatory sources. Principles of management including personnel management, theories of management and finance are very well covered. The chapter on medical care in the nursing home is very dated but since the intended audience of the book would not be responsible for medical management this may not be of great consequence. This is a basic review of principles relative to long term care. The format is easy to follow and this would be a useful reference text or review text for those in long term care administration.

Documentation, 2007 This full color handbook is a quick reference guide to all aspects of documentation for every nursing care situation. It covers current documentation systems and formats including computerized documentation and features scores of sample filled in forms and in text narrative notes illustrating everything from everyday occurrences to emergency situations. Coverage includes timesaving strategies for admission to discharge documentation in acute outpatient, rehabilitation, long term and home care environments and special documentation practices for selected clinical specialties, critical care, emergency, perioperative, maternal, neonatal and psychiatric. The book includes advice on legal safeguards, dangerous abbreviations and compliance with HIPAA guidelines and JCAHO requirements. Developing Clinical Indicators for Needed Skilled Nursing Facility Care Robert Schmitz, 2001

Complete Guide to Documentation Lippincott Williams & Wilkins, 2008 Thoroughly updated for its Second Edition this comprehensive reference provides clear practical guidelines on documenting patient care in all nursing practice settings, the leading clinical specialties and current documentation systems. This edition features greatly expanded coverage of computerized charting and electronic medical records (EMRs), complete guidelines for documenting JCAHO safety goals and new information on charting pain management. Hundreds of filled in sample forms show specific content and wording. Icons highlight tips and timesavers, critical case law and legal safeguards and advice for special situations. Appendices include NANDA taxonomy, JCAHO documentation standards and documenting outcomes and interventions for key nursing diagnoses.
