Since our childhood we have been using four fundamental operations of addition, subtraction, multiplication and division. We have applied these operations on natural numbers, integers, rational and irrational numbers. In this chapter, we will begin with a brief recall of divisibility in integers and will state some important properties of integers, namely, Euclid's Division Lemma, Fundamental Theorem of Arithmetic, etc. to learn more about integers and test

if integers. It is quite easy to state and can be divided by any other positive integer that is smaller than it. This is called division lemma. This step-wise procedure is called the Euclidean algorithm. This step-wise procedure is used for finding the HCF of positive
