Common Core State Standards and the Speech Language Pathologist Standards Based Intervention for Special Populations is a tool for the analysis of the Common Core State Standards (CCSS) and the development of interventions to meet student specific needs. The CCSS is an education initiative in the United States that details what K-12 students should understand in English language arts and mathematics by the end of each grade. The initiative seeks to establish consistent education standards across the United States and ensure that graduating students are prepared to enter college or the workforce. As of 2015, forty-three states had adopted the CCSS. With the implementation of the CCSS, it is critical that speech language pathologists collaborate with educators to enable the success of students with communication disorders as well as English language learners. This text offers a practical approach for application of the CCSS with a parallel analysis of children's strengths and needs to create a template for intervention. It addresses strategies to facilitate the success of students in accessing and achieving the expectations of the general curriculum with a focus on students with communication disorders, hearing loss, vision loss, deaf blindness, specific learning disabilities, autism, multiple disabilities, and English language learners. Key features include:

- Background and implications of the CCSS
- Chapters written by experts in the field
- Tools for analysis of the language expectations of the CCSS
- A framework for aligning intervention both direct and

classroom based with the CCSS for students at elementary and secondary levels Collaboration strategies to facilitate success in the classroom Multiple case studies Common Core State Standards and the Speech Language Pathologist is a must have resource for any speech language pathologist working with children as well as their education and administration partners
