**Outsmarting the Riptide of Domestic Violence** Patricia Pernicano, 2011-12-16 In *Outsmarting the Riptide of Domestic Violence Metaphor and Mindfulness for Change* Pat Pernicano translates issues central to domestic violence recovery into metaphorical stories and mindfulness narratives that will facilitate the change process. The stories are intended to be used in conjunction with trauma focused interventions in order to reduce troubling symptoms, address risk and relapse potential, change relational patterns and remediate attachment deficits. Pernicano provides practitioners with a needed bridge between theory and practice, a one of a kind resource for therapists, counselors and social workers who aid victims of domestic violence. Pernicano's book is organized according to the Transtheoretical Stages of Change Model and includes stories within each section to facilitate the change process in the individual while using TF CBT PRACTICE elements: Psycho education about domestic violence and trauma, Relaxation and stress reduction, Affective expression and regulation, Cognitive restructuring, Trauma narrative development and processing, In vivo exposure to avoided situations, Conjoint sessions with children and Enhancing future safety and healthy relationship development. *The Red Squirrel* Robert Torrens Hatt, 1929

*Family-Focused Trauma Intervention* Patricia Pernicano, 2010-03-18 Treatment of abuse and neglect needs to be family focused in order to reduce troubling symptoms, address family risk and relapse potential, treat cross generational patterns and remediate attachment deficits. Evidence based practices are available for child and family abuse treatment including Trauma Focused CBT but new intervention strategies are needed that reduce family and client denial, lower defensiveness and prevent re-traumatization during the treatment process. *Family Focused Trauma Intervention Using Metaphor and Play with Victims of Abuse and Neglect* translates issues central to abuse and neglect recovery into metaphorical stories and family based interventions. Each chapter provides a summary of an issue or theme, one or more pertinent stories and parallel family group and individual interventions. These stories and family focused interventions help clients regulate affect in order to reduce frequency and intensity of troubling symptoms. This volume is the missing link in the current literature on therapy and metaphor as it focuses specifically on parent child interaction and trauma. The content of this book, which may be used within any theoretical framework, provides a wide variety of practitioners with a needed bridge between theory and practice.

*Using Trauma-Focused Therapy Stories* Pat Pernicano, 2014-02-03 *Using Trauma Focused Therapy Stories* is a groundbreaking treatment resource for trauma informed therapists who work with abused and neglected children ages nine years and older as well as their caregivers. The therapy stories are perfect accompaniments to evidence based treatment approaches and provide the foundation for psychoeducation and intervention with the older elementary aged child or early pre-teen. Therapists will also benefit from the inclusion of thorough guides for children and caregivers which illustrate trauma and developmental concepts in easy to understand terms. The psychoeducational material in the guides, written at a third to fourth grade reading level, may be used within any trauma informed therapy model in the therapy office or sent home for
