Testing Sap Solutions:

Testing SAP Solutions Markus Helfen, Hans Martin Trauthwein, 2011 No Go live without testing But how do you make sure that your tests are comprehensive and deliver valid results This complete guide to test planning and test execution answers all of your questions Not only will you learn the basics for a test strategy and a test methodology that fits the requirements of your solution you will also understand functionality and usage of all the tools SAP and their partners provide for testing Extensive practical chapters on the most important tools SAP Solution Manager and eCATT as well as substantial introductions to TDMS HP Quality Center and SAP LoadRunner show exactly how to perform functional and performance tests In addition for each tool youll find a real life project report from a renowned SAP customer **Testing SAP R/3** Jose Fajardo, Elfriede Dustin, 2007-04-10 Testing SAP R 3 A Manager s Step by Step Guide shows how to implement a disciplined efficient and proven approach for testing SAP R 3 correctly from the beginning of the SAP implementation through post production support The book also shows SAP professionals how to efficiently provide testing coverage for all SAP objects before they are moved into a production environment **Successfully Managing S/4HANA Projects** Denise Banks-Grasedyck, Eckhard Lippke, Hans Oelfin, Reinhold Schwaiger, Volker Seemann, 2022-03-25 The book describes the complete project process in individual steps for SAP S 4HANA project management based on the SAP ACTIVATE implementation methodology By imparting knowledge based on experience with real SAP projects the book supports project managers in developing skills and qualifications that will lead them to the successful management of SAP projects In this context it emphasizes the crucial role of human interaction from the start to the successful completion of projects and provides useful tips on how to recognize and avoid pitfalls Enriched with a wide range of material such as templates checklists and practical examples the book provides concrete guidance for project managers and participants on how to successfully manage ongoing projects The book is valuable for both beginners and experienced project managers and also gives decision makers and stakeholders an excellent insight into the planning and management of large projects **IBM Software for SAP Solutions** Yaro Dunchych, Peter Bahrs, Khirallah Birkler, Bernd Eberhardt, Navneet Goyal, James Hunter, Derek Jennings, Joe Kaczmarek, Michel Laaroussi, Michael Love, Stefan Momma, Nick Norris, Martin Oberhofer, Manfred Oevers, Paul Pacholski, Andrew Stalnecker, Jörg Stolzenberg, Pierre Valiquette, IBM Redbooks, 2015-09-29 SAP is a market leader in enterprise business application software SAP solutions provide a rich set of composable application modules and configurable functional capabilities that are expected from a comprehensive enterprise business application software suite In most cases companies that adopt SAP software remain heterogeneous enterprises running both SAP and non SAP systems to support their business processes Regardless of the specific scenario in heterogeneous enterprises most SAP implementations must be integrated with a variety of non SAP enterprise systems Portals Messaging infrastructure Business process management BPM tools Enterprise Content Management ECM methods and tools Business analytics BA and business

intelligence BI technologies Security Systems of record Systems of engagement The tooling included with SAP software addresses many needs for creating SAP centric environments However the classic approach to implementing SAP functionality generally leaves the business with a rigid solution that is difficult and expensive to change and enhance When SAP software is used in a large heterogeneous enterprise environment SAP clients face the dilemma of selecting the correct set of tools and platforms to implement SAP functionality and to integrate the SAP solutions with non SAP systems This IBM Redbooks publication explains the value of integrating IBM software with SAP solutions It describes how to enhance and extend pre built capabilities in SAP software with best in class IBM enterprise software enabling clients to maximize return on investment ROI in their SAP investment and achieve a balanced enterprise architecture approach This book describes IBM Reference Architecture for SAP a prescriptive blueprint for using IBM software in SAP solutions The reference architecture is focused on defining the use of IBM software with SAP and is not intended to address the internal aspects of SAP components The chapters of this book provide a specific reference architecture for many of the architectural domains that are each important for a large enterprise to establish common strategy efficiency and balance The majority of the most important architectural domain topics such as integration process optimization master data management mobile access Enterprise Content Management business intelligence DevOps security systems monitoring and so on are covered in the book However there are several other architectural domains which are not included in the book This is not to imply that these other architectural domains are not important or are less important or that IBM does not offer a solution to address them It is only reflective of time constraints available resources and the complexity of assembling a book on an extremely broad topic Although more content could have been added the authors feel confident that the scope of architectural material that has been included should provide organizations with a fantastic head start in defining their own enterprise reference architecture for many of the important architectural domains and it is hoped that this book provides great value to those reading it This IBM Redbooks publication is targeted to the following audiences Client decision makers and solution architects leading enterprise transformation projects and wanting to gain further insight so that they can benefit from the integration of IBM software in large scale SAP projects IT architects and consultants integrating IBM technology with SAP solutions
