Transmedial Resonance Robert A. Rushing, 2026-01-20 Introduces a new way of understanding influence reception and adaptation via the work of Italy's most famous modern writer In *Transmedial Resonance* Robert A. Rushing addresses the remarkable and ongoing responses to the imagination of Italo Calvino Italy's most important modern writer Since his death in 1985 Calvino's writing has served as a constant figure of inspiration for other artists and tellingly that inspiration has been more outside than inside Although Calvino's reputation as a writer is immense his influence has in fact been vastly larger outside of literature including in architecture city planning community organizing design visual arts video games the performing arts and much more That influence is not only transmedial It has also been more outside than inside across national boundaries particularly in the English speaking world Rushing thinks about Calvino's influence through the metaphor of resonance When something resonates he argues it may be inspired to do so but it does so in its own voice singing its own song In fact resonance offers an entirely different way of thinking about influence and artistic reception stressing the energy of the inspiration rather than fidelity to the original In keeping with that underlying sonic metaphor Rushing looks at specifically acoustic responses to Calvino They include Chris Cerrone's Pulitzer nominated opera in headphones based on *Invisible Cities* Lisa Mezzacappa's *Cosmicomics* jazz suite and Ashwini Ramaswamy's multimedia dance performance of *Invisible Cities* which combines traditional South Indian Bharatanatyam urban breaking and African American modern dance These works Rushing shows tell the story of a very different Calvino one who is in Mezzacappa's words nerdy and neurotic playfully perverse and profoundly political Bringing together sound studies with literary studies and cultural reception *Transmedial Resonance* argues for a radical re imagination of how we think about artistic and cultural influence calling for a completely new understanding of this major figure of modern Italian and world literature [The Coming of Age of Solar and Wind Power](#) Tariq Muneer, Eulalia Jadraque Gago, Saioa Etxebarria Berrizbeitia, 2022-02-03 This book focuses on the current situation of two technologies for electricity production from renewable energy sources wind and solar photovoltaic energy analysing and describing both technologies in detail Four regions of the world with distinct energy markets and conditions are explored Together the USA Europe China and Japan represent one third of the world's population and occupy 25% of the planet therefore offering a representation of a global picture In each of these regions the development of the solar and wind energy is examined and the economic implications are described *Solar Photovoltaic System Applications* Parimita Mohanty, Tariq Muneer, Mohan Kolhe, 2015-10-30 Presenting a complete guide for the planning design and implementation of solar PV systems for off grid applications this book features analysis based on the authors own laboratory testing as well as their in the field experiences Incorporating the latest developments in smart digital and control technologies into the design criteria of the PV system this book will also focus on how to integrate newer smart design approaches and techniques for improving the efficiency reliability and flexibility of the entire system The design and

[Herd Register](#) American Guernsey Cattle Club, 1926 **The Dog Fancier**, 1928 [An Explorer's Notebook](#) Tim Flannery, 2010-06-01. The Weather Makers catapulted Tim Flannery's name into global consciousness; now he is known as one of the world's foremost experts on climate change. But he didn't just come into his knowledge and interest overnight. With its selection of exhilarating essays and articles written over the past 25 years, *An Explorer's Notebook* charts the evolution of a young scientist doing fieldwork in remote locations to the major thinker who has changed the way we all view our actions in the face of global warming. Flannery writes about his journeys in the jungles of New Guinea and Irian Jaya, about the extraordinary people he met and the species he discovered. He writes about matters as wide-ranging as love, insects, population, water, and the stresses we put on the environment. He explores how we can predict our own future by understanding the profound history of life on Earth. He also chronicles the recent seismic shift in the world's attitude toward climate change, noting the deep impact felt by all of us. He writes on a wide variety of topics, from the huge increase in the number of accidental falls experienced by Winnipeg pedestrians each winter to the huge decrease in traditional circumcisions in the African Samburu tribe, a decrease that is
