**Structural Analysis of Aggregate Blends Using the SHRP Gyratory Compactor** Dan L. Seward,John A. Hinrichsen,Jennifer Ries,1996 The Iowa Department of Transportation IDOT received a Strategic Highway Research Program SHRP gyratory compactor in December 1994 Since then IDOT has been studying the ability of the compactor to analyze fundamental properties of aggregates such as shape texture and gradation by studying the volumetrics of the aggregate

blends under a standard load using the SHRP gyratory compactor This method of analyzing the volumetrics of aggregate blends is similar to SHRP's fine aggregate angularity procedure which analyzes void levels in noncompacted aggregate blends which in turn can be used to evaluate the texture or shape of aggregates what SHRP refers to as angularity Research is showing that by splitting the aggregate blend on the 2 36 mm 8 sieve and analyzing the volumetrics or angularity of the separated blend important fundamental properties can be determined Most important is structure the degree and location of aggregate interlock In addition analysis of the volumes of the coarse and fine portions can predict the voids in the mineral aggregate and the desired asphalt content By predicting these properties it can be determined whether the combined aggregate blend when mixed with asphalt cement will produce a mix with structural adequacy to carry the designed traffic load

Dieter Urban,Koichi Takamura,2002 Aqueous polymer dispersions are environmentally friendly and therefore they have replaced in many applications polymers dissolved in organic solvents This substitution process is still ongoing This book discusses the world of aqueous polymer dispersions from the viewpoint of how they are applied For a better understanding it starts with a general description of the synthesis of polymer dispersions and their characterization The following chapters are dedicated to a wide variety of applications including history modern processes and typical formulations and performance The selection and the usage of a polymer dispersion are not uniform around the world because of historical and regional differences of the technical developments and marketing demands Leading scientists from industry contributed to this book ensuring that practical issues are emphasized
