Clinical Supervision Elizabeth L. Holloway, 1995-06-16

In her systems approach to supervision, the author presents a unique system of clinical supervision developed with her colleagues over years of experience as supervisors of psychologists in training. The book is written in a reader friendly manner and is both theoretical and practical. The prose is clear, the charts are easily decipherable. Research findings are separated onto single pages interspersed throughout pertinent sections and printed in darker shades to draw the eye. The various levels of the supervisory session transcript recall interview analysis are placed in columns side by side for easy comparison. The author has succeeded in dissecting the complex instructional strategy of modeling counseling task function and skill within the supervisory relationship. Her work is a valuable complement to the existing body of literature Susan B. DeVaney in *Counseling Today*. The book uses a range of interesting transcripts to illustrate points together with providing up to date research information on subjects such as trainee learning needs, supervisor and trainee gender, institutional factors and supervisor experience to mention but a few.
