**The School Science Review** ,2003      **Sportswomen in Cinema** Nicholas Chare,2015-03-17 Sportswomen in Cinema considers both documentary and fiction films from a variety of periods and cultures by directors including Kathryn Bigelow Gurinder Chadha Im Soon rye George Kukor Ida Lupino and Leni Riefenstahl Drawing from psychoanalytic and phenomenological theories the book presents a series of landmark close readings of films featuring a variety of different forms of athletic activity including baseball basketball bodybuilding boxing climbing football rollerderby surfing tennis and track and field In focusing on themes such as gesture screen space and sound it moves beyond a purely narrative analysis of sports films What s more as well as building on existing scholarship in sports studies to argue that sport should always be conceived of as more than simply competitive the book also contributes to ongoing efforts in film

theory to foster new feminist discourses on sexual difference. The ideas of thinkers such as Judith Butler, Bracha Ettinger, Griselda Pollock and Michel Serres are employed to explore how films featuring female athletes reflect changing perspectives on femininity and sexuality and also potentially contribute to transforming our perceptions about sportswomen and cinema. Sportswomen in Cinema is an important addition to the literature of film studies, gender studies and sports studies.

[Nature Sports](#) Ricardo Melo, Derek Van Rheenen, Sean Gammon, 2023-11-07 This book represents the first international collection that challenges current thinking and research in the emerging field of nature sport. Owing to its inherent connections with fields such as business, leisure, health, tourism and education, this emerging field has attracted perspectives from a wide range of theoretical viewpoints, much of which are discussed within this collection. In simple terms, nature sports refer to a group of sporting activities that predominantly take place in natural and rural areas. Participation can be both competitive and recreational, with the primary aim to work in relation to nature where participants seek harmony rather than the quest to conquer it. Within this book, experts from around the globe consider the very essence of nature sports, including numerous practical examples of it in action, offering invaluable insights to those both familiar and new to the field. Driven by an increase in non-traditional sports, coupled with growing concerns about the environment, nature sports have experienced significant expansion and interest in both participation and academic debate. This book is a valuable resource for students and academics in fields such as alternative sports, alternative sport subcultures, sport philosophy, sport and social issues, ethics and phenomenology. It is also a fascinating read for outdoor educators and practitioners. The chapters in this book were originally published as special issues in *Annals of Leisure Research*.
