Surface Architecture:

Surface Architecture David Leatherbarrow, Mohsen Mostafavi, 2005-02-11 A study of the building surface architecture s primary instrument of identity and engagement with its surroundings Visually many contemporary buildings either reflect their systems of production or recollect earlier styles and motifs This division between production and representation is in some ways an extension of that between modernity and tradition In this book David Leatherbarrow and Mohsen Mostafavi explore ways that design can take advantage of production methods such that architecture is neither independent of nor dominated by technology Leatherbarrow and Mostafavi begin with the theoretical and practical isolation of the building surface as the subject of architectural design The autonomy of the surface the free facade presumes a distinction between the structural and nonstructural elements of the building between the frame and the cladding Once the skin of the building became independent of its structure it could just as well hang like a curtain or like clothing The focus of the relationship between structure and skin is the architectural surface In tracing the handling of this surface the authors examine both contemporary buildings and those of the recent past Architects discussed include Albert Kahn Ludwig Mies van der Rohe Alison and Peter Smithson Alejandro de la Sota Robert Venturi Jacques Herzog and Pierre de Meuron The properties of a building s surface whether it is made of concrete metal glass or other materials are not merely superficial they construct the spatial effects by which architecture communicates Through its surfaces a building declares both its autonomy and its participation in its surroundings *Surface Architecture* David Leatherbarrow, Mohsen Mostafavi, 2005 Visually many contemporary buildings either reflect their systems of production or recollect earlier styles and motifs This text explores ways that design can take advantage of production methods so that architecture is neither independent of nor dominated by technology

The American Architect , 1918 *Towards a Critique of Architecture's Contemporaneity* Gevork Hartoonian, 2023-02-14 Pursuing historical analogies between nineteenth century theories and the current practices captivated by digital reproducibility this book offers a critical take on architecture s contemporaneity through four essays tectonics materiality cladding and labor Fundamental to this proposition is the historicity of Gottfried Semper s theorization of architecture amidst the outpouring of new materials and construction techniques during the 1850s Starting with Semper s differentiation between theatricalization and the tectonic of theatricality this book examines thematic essential to architecture s self representation Even though the title of this book recalls the Semperian Four Elements of Architecture its argument encapsulates a unique historico theoretical project probing the tectonic of theatricality beyond Semper The invisible tie between technique and labor is the cord running through the four subjects covered in this book In exploring these subjects from the theoretical standpoint of Marxian dialectics this book s contribution is focused on but not limited to the topicality of labor today when its relationship with capital has been further obscured by the prevailing digitalization of commodity exchange value starting roughly in the 1990s Each essay examines Semper s theorization of architecture in

contradistinction to the ways in which technology's mediation has dominated architecture's representation. Burrowing through the invisible tie between technique and work asymptomatic of architecture's predicament in global capitalism. Towards a Critique of Architecture's Contemporaneity advances the scope of architectural criticism beyond the exhausted formalism and architecture's turn to philosophy circa the 1980s and the present tendencies for presentism. It will therefore be of interest to researchers and students of architectural history and theory.

Military Training Activities at Mākua Military Reservation, Hawai'i, 2005 **Landscape Architecture**, 1914 **Scanning Electron Microscopy** Viacheslav Kazimiruk, 2012-03-09 Today an individual would be hard pressed to find any science field that does not employ methods and instruments based on the use of fine focused electron and ion beams. Well instrumented and supplemented with advanced methods and techniques SEMs provide possibilities not only of surface imaging but quantitative measurement of object topologies local electrophysical characteristics of semiconductor structures and performing elemental analysis. Moreover a fine focused e beam is widely used for the creation of micro and nanostructures. The book's approach covers both theoretical and practical issues related to scanning electron microscopy. The book has 41 chapters divided into six sections: Instrumentation, Methodology, Biology, Medicine, Material Science, Nanostructured Materials for Electronic Industry, Thin Films, Membranes, Ceramic, Geoscience, and Mineralogy. Each chapter, written by different authors, is a complete work which presupposes that readers have some background knowledge on the subject.

Architecture, 1907 **Designing Kinetics for Architectural Facades** Jules Moloney, 2011-06-14 Architectural facades now have the potential to be literally kinetic through automated sunscreens and a range of animated surfaces. This book explores the aesthetic potential of these new types of moving facades. Critique of theory and practice in architecture is combined here with ideas from kinetic art of the 1960s. From this background the basic principles of kinetics are defined and are used to generate experimental computer animations. By classifying the animations a theory of kinetic form called state change is developed. This design research provides a unique and timely resource for those interested in the capacity of kinetics to enliven the public face of architecture. Extra material including animations can be seen at www.kineticarch.net/statechange.

American Architect, 1908 **Society and Death in Ancient Egypt** Janet E. Richards, 2005-03-07 Janet Richards considers social stratification in Middle Kingdom Egypt exploring the assumption that a middle class arose during this period. By focusing on the entire range of mortuary behavior she shows how Middle Kingdom Egyptian practices and landscapes relating to death reveal information about the living society.

Ancient Communities in the Mimbres Valley Roger Anyon, Steven A. LeBlanc, 2024-04-09 Spanning from the end of the Classic Mimbres period to the Black Mountain phase this volume contains the final report on the excavations of the Mimbres Foundation. The authors consider the nature of the relationship between the Classic Mimbres period population of the valley and the people of the succeeding Black Mountain phase as well as relationships among the Black Mountain phase people and those of neighboring parts of the region.

Surface Architecture: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous captivating novels captivating the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the captivating narratives that have captivated audiences this year. The Must-Read : Colleen Hoovers "It Ends with Us" This poignant tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Surface Architecture : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and suspenseful novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
