Sustainable Crop Disease Management Using Natural Products:

Sustainable Crop Disease Management using Natural Products Sangeetha Ganesan, Kurucheve Vadivel, Jayaraj Jayaraman, 2015-11-16 Alternative methods of disease control such as natural products and compounds derived from biological origins provide an effective alternate to the use of chemical products or a means to minimize their use. It is imperative now to look for such sustainable crop disease management approaches that include routine and alternative methods. Natural products for sustainable crop disease management is an effort in this direction and deals with immediate concerns in the field of natural and alternative products for disease control apart from using biocontrol organisms. This book presents up to date information on natural products and compounds derived from biological origins and thoroughly discusses their applicability, field use and prospects for adoption under different cropping conditions. This book also validates disease management strategies.

Integrated Pest and Disease Management in Greenhouse Crops Maria Lodovica Gullino, Ramon Albajes, Philippe C. Nicot, 2020-03-17 This book represents a new completely updated version of a book edited by two of the current editors published with Springer in 1999. It covers pest and disease management of greenhouse crops providing readers the basic strategies and tactics of integrated control together with its implementation in practice with case studies with selected crops. The diversity of editors and authors provides readers a complete picture of the world situation of IPM in greenhouse crops.

Recent Advances in the Diagnosis and Management of Plant Diseases L.P. Awasthi, 2015-11-19 This book is a compilation of the most challenging and significant chapters on the diagnosis and management of important bacterial, fungal, viral, viroid, phytoplasma, non parasitic diseases and various physiological disorders in various crops. The chapters have been contributed by eminent plant pathologists having wide experience of teaching and research on various crops with different types of diseases which cause great economic losses. The book would be very useful for students, teachers and researchers of plant pathology. This book highlights recent advances made in the development of new types of resistance in host plants and alternative strategies for managing plant diseases to improve food quality and reduce the negative public health impact associated with plant diseases. Having entered into 21st century advancements in the Diagnosis of Plant Pathogens and Plant Disease Management need to be closely examined and adequately applied so that newer challenges facing plant pathology could be adequately addressed in attaining food security for the growing population. Substantial advancements have been made in terms of expanding knowledge base of the biology of plant microbial interactions, disease management strategies and application and practice of Plant Pathology. Application of molecular biology in Plant Pathology has greatly improved our ability to detect plant pathogens and in increasing our understanding their ecology and epidemiology. Similarly, new technologies and resources have been evolved for the development of sustainable crop protection systems by different control strategies against various pests and pathogens that are important components of the integrated pest management programme. Natural products and chemical compounds discovered as a result of basic

research and molecular mechanisms of pathogenesis have led to the development of biorational pesticides Biological control has been found to be the most significant approach to plant health management during the twentieth century and promises using modern biotechnology to be even more significant in the twenty first century *Integrated Pest Management Conference Proceedings* ,2002 Annual Research Report ,1996 **Annual Report** National Botanical Research Institute (India),2007 **Congress on Traditional Sciences and Technologies of India, 28 Nov.-3 Dec. 1993, Indian Institute of Technology, Bombay** ,1995 **Horticultural Research in Canada** ,1993 Horticultural Abstracts ,1992 Annual Report ,1988 ETFRN News ,2000 *International Research Centers Directory* ,2009 Cultural and Spiritual Values of Biodiversity United Nations Environment Programme,1999 Weaving together philosophical historical legal scientific and personal viewpoints this book gives a rich sample of the vast web which makes up our cultural spiritual and social diversity The volume highlights the central importance of cultural and spiritual values in the appreciation and preservation of all life and argues that these values give us a true reflection of worth It demonstrates how many cultures see Nature as an extension of society and how sensitive stewardship is an integral part of existence The book covers language and how cognition and speech encode indigenous knowledge systems are critical for preservation of diversity the complex issue of indigenous people and the problems of preserving their relationships both with and within their societies voices of the world expressions of concern and disquiet over the declining world diversity holistic health practices where environment and diet are integrated into indigenous medical health systems the importance of developing effective intellectual property rights and territorial and land rights to enhance and maintain local control This book arose out of the Global Biodiversity Assessment GBA a massive review of current knowledge in the broad field of biological diversity commissioned by United Nations Environmental Programme UNEP **The Indian Journal of Agricultural Sciences** ,1998 *Economic and Social Survey, Jamaica* ,2002 **Report** Horticulture Research International (Great Britain),1999 **Highlights of Agricultural Research** ,1995 Bibliography of Agriculture with Subject Index ,2000 **The Orchardist** ,1995
