*Real World Professional Learning Communities* Daisy Arredondo Rucinski, 2016-12-08

In a professional learning community PLC teachers are organized into teams committed to meeting on a regular basis to study their teaching strategies and the effects of those strategies on the students in their classrooms. The teacher teams can be of varied form and composition. Whatever the organizational structure the teams have one goal that is to improve teaching so that student learning is improved. Policy developers, legislators and educational leaders have encouraged the adoption of collaborative professional learning teams as a school reform model for improving schools. In this book we describe the results of studies of professional learning communities in real schools and the effects of the teams on student learning. Much of the time school innovations are not examined in depth. Instead authors and developers simply advocate that they be used. In this book school principals and administrators describe how their teachers used the PLC teams to improve student learning in their schools. In other words this book presents actual research on the effects of the use of PLCs rather than testimonials.

**Common Formative Assessment** Kim Bailey, Chris Jakicic, 2012

In Common Formative Assessment: A Toolkit for Professional Learning Communities at Work authors Kim Bailey and Chris Jakicic argue that real improvement in student achievement can begin when teams tackle the task of writing and implementing common formative assessments. They assert that teams that are engaged in designing, using and responding to common formative assessments become more knowledgeable about their standards, more assessment literate and able to develop more strategies for helping all students learn. The authors use a comfortable conversational tone to describe how to create and incorporate common formative assessments into the practices of a PLC to monitor and enhance student learning. They provide numerous accessible tools and templates for teams to adjust to suit their own needs and offer protocols with clearly listed steps educators can take to facilitate the formative assessment process. Chapter 1 provides an overview of the purpose, structure

and workings of a professional learning community The authors provide an explanation of how common formative assessments fit into the work of teams Chapter 2 defines common formative assessments and explains where they along with other types of assessments fit in a balanced assessment system and provides schools with guidelines for designing these systems using assessment data effectively and efficiently Chapter 3 explains how teams can approach the foundational work of identifying and using power standards as the starting point for creating common formative assessments Chapter 4 guides teams through the process of unwrapping their power standards to reveal clear learning targets for instruction and formative assessment Using a seven step process chapter 5 focuses on how to develop and design assessments for learning targets in a way that will provide accurate data and clear information to teachers and students Chapter 6 provides tools and outlines steps for creating pacing guides and designing unit plans that respond to and incorporate assessments Chapter 7 contains protocols teams can use to gather organize and analyze data in a way that will best enable them to identify students needs Chapter 8 explores ways that teachers can involve students in the assessment process and encourage students to assume ownership of their own learning Chapter 9 addresses how teams can continue to improve stay motivated and sustain their efforts

**Common Formative Assessment** Kim Bailey,Chris Jakicic,2011-10-11 Teams that engage in designing using and responding to common formative assessments are more knowledgeable about their own standards more assessment literate and able to develop more strategies for helping all students learn In this conversational guide the authors offer tools templates and protocols to incorporate common formative assessments into the practices of a PLC to monitor and enhance student learning
