chapters are written by leading internationally distinguished qualitative researchers who recount and reflect on their own research experiences as well as others past and present from whom they have learned. It demonstrates the benefits of using particular methods from the viewpoint of real life experience. This is also a good philosophy for students to adopt in planning research work to begin from a practical conception of the research process and to treat a book like this as an opportunity to learn a valuable craft. From the outside good research seems to be produced through practitioners learning and following standard theoretical, empirical and procedural formats. But from the inside we learn that qualitative research like other forms of scientific endeavour is also a biographical engagement rendering its scholarly and practical contributions in its own terms. Standards take on practical meaning as the distinct activities of qualitative research resonate throughout the enterprise complicating its accountability to itself and to others. In an authoritative yet accessible manner *Qualitative Research Practice* reveals the special features of this engagement teaching us that qualitative research is as much a craft and practice as it is a way of knowing. Presenting a comprehensive examination of contemporary and traditional varieties of qualitative research practice *Qualitative Research Practice* will be an invaluable resource for advanced students and researchers in any discipline. It is an essential and definitive guide to the major forms of qualitative methods in use today written by leaders in the relevant fields of research practice. *A Treatise on Light* Robert Alexander Houstoun, 1930 *The London, Edinburgh and Dublin Philosophical Magazine and Journal of Science*, 1921
