**A Topical Guide to Schenkerian Literature** David Carson Berry,2004 To the growing list of Pendragon Press publications devoted to the work of Heinrich Schenker we wish to announce the addition of this much needed bibliography The author a student of Allen Forte has created a work useful to a wide range of researchers music theorists musicologists music librarians and teachers The Guide is the largest Schenkerian reference work ever published At nearly 600 pages it contains 3600 entries 2200 principal 1400 secondary representing the work of 1475 authors Fifteen broad groupings encompass seventy topical headings many of which are divided and subdivided again resulting in a total of 271 headings under which entries are collected

**The Complete Topical Guide to the Bible** Martin Hugh Manser,Alister McGrath,J. Packer,Donald Wiseman,2017-05-02 The Complete Topical Guide to the Bible provides Scripture references definitions and cross references for the study of the Bible by topic The topical approach differs significantly from the lexical approach of a concordance and a topical guide is an essential supplement to a concordance While a concordance is limited to the connection of biblical passages in which the same word appears the topical approach identifies and connects all of the underlying concepts related to a topic A concordance would not yield John 3 16 for a study of grace because the word grace does not appear in the verse but The Complete Topical Guide to the Bible includes John 3 16 for grace because it s an essential verse on the topic The topics in this resource include biblical doctrinal and historical subjects and they are organized into nine major categories God Jesus Christ the Holy Spirit creation humanity sin and salvation God s people the life of the believer and the last things In addition to the great themes of the biblical message practical issues of Christian living are also included

**Relationships in the Organization of Knowledge** A. Bean,R. Green,2013-04-17 Relationships abound in the library and information science LIS world Those relationships may be social in nature as for instance when we deal with human relationships among library personnel or relationships i e public relations between an information center and its clientele The relationships may be educational as for example when we examine the relationship between the curriculum of an accredited school and the needs of the work force it is preparing students to join Or the relationships may be economic as when we investigate the

relationship between the cost of journals and the frequency with which they are cited Many of the relationships of concern to us reflect phenomena entirely internal to the field the relationship between manuscript collections archives and special collections the relationship between end user search behavior and the effectiveness of searches the relationship between access to and use of information resources the relationship between recall and precision the relationship between various bibliometric laws etc The list of such relationships could go on and on The relationships addressed in this volume are restricted to those involved in the organization of recorded knowledge which tend to have a conceptual or semantic basis although statistical means are sometimes used in their discovery *A Topical Guide* Judie Brown, 1996
