Mellom, Rebecca K. Hixon, Jodi P. Weber, 2019 This conversation based approach accelerates language acquisition for EL students and advances academics and social emotional learning for all The authors present a research based pedagogical model to help K-12 teachers modify the way they plan and implement their lessons to better support the linguistic cognitive and social emotional development of culturally and linguistically diverse students The authors remind us that we are working too hard in our roles as providers of knowledge and literacy Rather a focus on collaborative interactions among students better enables their autonomy mutual learning and self directed paths to meaning and knowledge The teacher onus is reduced yet students ownership and confidence are bolstered in more socioconstructive and effectual ways This work is a must read for all educators Socorro G. Herrera Kansas State University and author of *Accelerating Literacy for Diverse Learners* Describes a system of classroom practice that centers on discourse rich pedagogies This book makes an important contribution to the growing field of culturally and linguistically sustaining instructional strategies Cory Buxton College of Education Oregon State University The authors detailed model for achieving joint productive activity transforms the

mysterious alchemy of great teaching into a thoughtful collaborative and mindful process all teachers can use to engage students in learning Betsy R Rymes Penn Graduate School of Education **Teaching Computational Thinking and Coding in Primary Schools** David Morris,Gurmit Uppal,David Wells,2017-05-22 This is a guide to the teaching of computing and coding in primary schools and an exploration of how children develop their computational thinking It covers all areas of the National Curriculum for primary computing and offers insight into effective teaching The text considers three strands of computer science digital literacy and information technology The teaching of coding is especially challenging for primary teachers so it highlights learning on this giving practical examples of how this can be taught For all areas of the computing curriculum the text also provides guidance on planning age appropriate activities with step by step guides and details of educationally appropriate software and hardware This book helps you to connect what you need to teach with how it can be taught and opens up opportunities in the new curriculum for creative and imaginative teaching It also includes the full National Curriculum Programme of Study for Computing key stages 1 and 2 as a useful reference for trainee teachers
