End-to-End Data Science with SAS James Gearheart, 2020-06-26 Learn data science concepts with real world examples in SAS End to End Data Science with SAS. A Hands On Programming Guide provides clear and practical explanations of the data science environment, machine learning techniques and the SAS programming knowledge necessary to develop machine learning models in any industry. The book covers concepts including understanding the business need, creating a modeling data set, linear regression, parametric classification models and non-parametric classification models. Real world business examples and example code are used to demonstrate each process step by step. New data scientists or professionals who want more experience with SAS will find this book to be an invaluable reference. Take your data science career to the next level by mastering SAS programming for machine learning models.

Extreme Writing Keen J. Babbage, 2010-03-16 In recent years, educators have become increasingly concerned about the writing skills of students in elementary, middle and high school. They wonder what can be done to build proper writing skills, particularly in a generation of students who may consider text messaging to be the only writing a person needs to do. Extreme Writing describes how teachers can build upon the eagerness and skills that students apply to recreational, social and friendly writing, bringing enjoyment back into writing for students. The Extreme Writing approach is not a precise formula for student achievement, rather it is a shared discovery of the process, the adventure, the wonder and the liberation inherent in writing.
