Trainer for Windows PowerShell 3.0 and Windows PowerShell 4.0 William Stanek,2014-08-25 From the premiere author in Windows administration and Microsoft technologies a hands on personalized guide to Windows PowerShell 3.0 and Windows PowerShell 4.0 Chances are that if you work with Windows computers you've heard of Windows PowerShell. You may even have read other books about PowerShell and put PowerShell to work. However you probably still have many questions about PowerShell or you may simply be curious about what PowerShell 3.0 and PowerShell 4.0 have to offer. Their predecessors didn't. Windows PowerShell 3.0 and Windows PowerShell 4.0 are enhanced and extended editions of the original implementations of PowerShell. The changes are dramatic and they improve both the performance capabilities of PowerShell and its versatility. You can do things with PowerShell 3.0 and PowerShell 4.0 that you simply could not do with earlier versions and you can perform standard tasks in much more efficient ways than before. This book is designed for anyone who wants to learn Windows PowerShell. Inside you'll find comprehensive overviews, step-by-step procedures, frequently used tasks, documented examples, and much more. One of the goals is to keep the content so concise that the book remains compact and easy to navigate while at the same time ensuring that the book is packed with as much information as possible, making it a valuable resource.

Computational Approaches for Aerospace Design Andy Keane,Prasanth Nair,2005-08-05 Over the last fifty years the ability to carry out analysis as a precursor to decision making in engineering design has increased dramatically. In particular the advent of modern computing systems and the development of advanced numerical methods have made computational modelling a vital tool for producing optimized designs. This text explores how computer-aided analysis has revolutionized aerospace engineering, providing a comprehensive coverage of the latest technologies underpinning advanced computational design. Worked case studies and over 500 references to the primary research literature allow the reader to gain a full understanding of the technology, giving a valuable insight into the world's most complex engineering systems. Key Features: Includes background information on the history of aerospace design and established optimization, geometrical and mathematical modelling techniques; setting recent engineering developments in a relevant context; Examines the latest methods such as evolutionary and response surface

based optimization adjoint and numerically differentiated sensitivity codes uncertainty analysis and concurrent systems integration schemes using grid based computing Methods are illustrated with real world applications of structural statics dynamics and fluid mechanics to satellite aircraft and aero engine design problems Senior undergraduate and postgraduate engineering students taking courses in aerospace vehicle and engine design will find this a valuable resource It will also be useful for practising engineers and researchers working on computational approaches to design *Beginning T-SQL with Microsoft SQL Server 2005 and 2008* Paul Turley,Dan Wood,2011-01-06 If you ve not programmed with Transact SQL this book is for you It begins with an overview of SQL Server query operations and tools used with T SQL and covers both the 2005 and 2008 releases of SQL Server query tools and the query editor The book then moves to show you how to design and build applications of increasing complexity Other important tasks covered include full text indexing optimizing query performance and application design and security considerations The companion website also provides all of the code examples from the book

Arvind Pandey,1997 Papers presented at a seminar held at Lucknow in December 1994 sponsored by the International Institute for Population Sciences Returning Migrant Workers United Nations. Economic and Social Commission for Asia and the Pacific,1986 The research reports and statements by government representatives contained in this volume were

presented at the Policy Workshop on International Migration in Asia and the Pacific held at Bangkok from 15-21 October 1985. The workshop was the final activity of a 2 year Economic and Social Commission for Asia and the Pacific ESCAP project on international migration policy in Asia and the Pacific funded by the UN Fund for Population Activities. The 2nd phase of the project includes the studies reported in this volume which were intended to be exploratory. They were meant to assess the current state of knowledge regarding return migration and to identify critical issues that would require further investigation. 5 of the studies are concerned with return migration from temporary employment primarily in the Middle East. Because many of the labor sending countries of the Mediterranean basin experienced a rapid expansion of labor emigration largely to northern and western Europe and a contraction of the flow and increase in return migration prior to current trends in Asian labor migration it was felt that a background paper on that experience would be valuable to policy makers in the ESCAP region. Migration from the Pacific sub region of ESCAP is both of more variable duration and less heavily labor oriented than temporary migration from Asian countries to the Middle East. The workshop's objectives were 1 to bring together researchers and policy makers to review carefully the results of the 7 studies carried out as part of the project 2 to relate the research findings to feasible government policies for the reintegration of returning labor migrants and 3 to make and disseminate policy recommendations to governments in the ESCAP region.
