Melting the ice: Engaging and educational ice-breaker activities for every learning session Jen Schneider,2023-04-14 The first five minutes of a classroom experience are critical

The tone set in a session's opening minutes can significantly impact and influence in both positive and negative ways the quality and nature of the subsequent learning experience. How students spend that time can also have a positive impact on their learning in both the short and long term. When the opening minutes of a class are approached as an opportunity to build student connections, collaboration and community, all learners benefit. As more and more learning experiences occur in synchronous and asynchronous online learning environments, strategies that both welcome students to online sessions and support student learning are increasingly important. Traditional ice breakers, while typically shared with a goal of building community and student engagement, can sometimes have unintended or even negative consequences on students. This text shares a collection of powerful opening activities that are designed to simultaneously engage students, build safe and connected classroom communities and support student learning. All strategies are easily adapted and personalized to fit individual course and content needs, including face to face, synchronous online and asynchronous online learning contexts. Shared activities are aligned with associated learning science research and incorporate strategies that have been shown to support student engagement and learning, such as retrieval practice, active recall, spaced practice and interleaving, among other evidence based instructional strategies.

Attract, Retain, and Develop Nicholas Wyman,2025-04-08 From an award winning chef turned workforce practitioner, the fresh approach to hiring and retention that you hunger for. As a hiring manager or business owner, you feel the strain of technology driven skill transformations, economic uncertainty and generational shifts. Science: Experiment and discovery ,1965 **Study of Airborne Science Experiment Management Concepts for Application to Space Shuttle, Volume 2** ,1973 **More Than Just BS** Jayson Marwaha,2012-10-04

Applying to combined BS MD programs really really stinks unless you're guided by the right person. That's what Jayson is a student who got into some of the nation's top BS MD programs at Brown, Caltech, and Penn State through countless nights of energy drinks. He realized this when he was in high school. This book fixes that. *More Than Just BS* is Jayson's unique, tested, foolproof plan to acing the apps for these crazily competitive medical programs. It's a resume building, preparation plan, a step by step guide to the application process, plus a safe haven for students. It's got checklists, summaries, clever shortcuts, sneaky tips, and tons of cheeky remarks.

Advances in Research on Age in the Workplace and Retirement Cort W. Rudolph, Hannes

Zacher, Susanne Scheibe, 2018-01-16. Shifts in the age composition of the workforce coupled with dynamic definitions of retirement represent important issues that influence work processes and more generally the experience of working across one's career. For example, redefinitions of careers and the changing nature of working have contributed to the emergence of distinct forms and patterns of work experiences across the prototypical work lifespan. Likewise, older individuals are increasingly delaying retirement in favor of longer term labor force participation. The study of age and work and work and retirement by industrial work and organizational IWO psychologists and scholars of human resources management and organizational behavior HR OB has recently proliferated in part as a result of such trends along with the recognition that age related processes are important indicators of various proximal e.g. job attitudes, work behaviors, work motives and wellbeing and distal outcomes e.g. sustainable employability, climates for aging and firm performance at various levels of abstraction in modern work environments. Recent theoretical advances have suggested that age along with individual psychological factors and various contextual influences can jointly influence work outcomes that contribute to long term employment success including work performance, job attitudes, work orientations and motivations. Similar theoretical developments concerning retirement have postulated individual and contextual elements that drive success in the transition from career and work roles to non work and leisure as well as post retirement bridge employment roles. In this Research Topic we aim to curate a

collection of papers that are representative of current trends and advances in thinking about and investigating the role of age in workplace processes and the changing nature of retirement Our hope is to showcase various contemporary ideas and rigorous empirical studies as a means to inform broader thinking and to support enhanced theorizing and organizational practice regarding these processes
