Future Histories Lizzie O'Shea, 2019-05-14 The key to understanding technology lies not in the future but in the past That s the contention of Lizzie O Shea s Future Histories a grand tour through past and present to explore the practical and sometimes revolutionary possibilities of our digital age Searching for new ways to think about our networked world O Shea asks what the Paris Commune can tell us about the ethics of the Internet and finds inspiration in the revolutionary works of Thomas Paine and Frantz Fanon She examines Elon Musk s futuristic visions only to find them mired in a musty Victorian era utopianism Instead of current day capitalist visionaries O Shea returns us to the Romantic age of wonder when art and science were as yet undivided narrating the collaboration between Ada Lovelace the brilliant daughter of Lord and Lady Byron and polymath Charles Babbage who together designed the world s first computer In our brave new world of increased surveillance biased algorithms and fears of job automation O Shea weaves a usable past we can employ in the service of emancipating our digital tomorrows

The American Middle Class Robert S. The Company Citizen Tom Levitt, 2017-11-29 Business doing good is doing good business this book learns from the era

where governments ruled the world pre globalisation and where business looked after itself where issues like climate change resource depletion and even poverty and hunger were not thought to be the responsibility of business The Company Citizen concludes that not only are these key issues for business today but that the world will not be able to manage these issues without the active participation even leadership of business Aware of the shortcomings of both government and civil society the author argues that environmental sustainability economic and social inclusion and the better management of resources are all key issues for business and that it makes good business sense to manage them better This book examines the case for the company citizen on a global national and community level working alongside other Never has the conscientious company citizen as envisaged by 19th century Quaker philanthropists been more needed and never has that business case one that justifies a long term commitment to practical corporate behaviour for good been more clear Drawing attention both to the businesses that are taking the lead and those who are holding us back the author concludes that only by involving business can we tackle the great issues of the day and survive as communities nation and planet

Tapia, Fayruz Kirtzman, 2023-05-23 A comprehensive new model for creating inclusive organizations illuminating the vital role that inclusion plays in developing solutions to the critical social environmental and leadership challenges we face Most organizational DEI efforts are focused on changing individual behaviors But unless you change the organizational structures the practices processes and systems that surround and support individual behaviors your change efforts will not take root Structural inclusion makes behavioral inclusion stick Andrs Tapia and Fayruz Kirtzman have found that five disciplines encompass the structures mindsets behaviors and accountabilities required for creating inclusive organizations that will have transformational impact not only on their culture and people but also on society and the planet

- 4 Master the Logistics integrate DEI into operations in ways that lead to improved efficiencies
- 5 See the Marketplace expand to new consumer market segments enhance cross culturally competent customer service and form effective partnerships with overlooked communities

The authors provide assessment tools and case studies of organizations that have implemented each discipline highlighting what worked and what tripped them up And they take a wider view showing how inclusive organizations practicing the five disciplines can address what they call society's four vital tasks diversify leadership eradicate polarization achieve justice and save the planet This is a complete guide to how to make your organization a systematic process oriented engine of change for the full range of your stakeholders
