The Oxford Illustrated History of World War Two Richard Overy, 2015-04-09 World War Two was the most devastating conflict in recorded human history. It was both global in extent and total in character. It has understandably left a long and dark shadow across the decades. Yet it is three generations since hostilities formally ended in 1945 and the conflict is now a lived memory for only a few. And this growing distance in time has allowed historians to think differently about how to describe it, how to explain its course and what subjects to focus on when considering the wartime experience. For instance as World War Two recedes ever further into the past even a question as apparently basic as when it began and ended becomes less certain. Was it 1939 when the war in Europe began? Or the summer of 1941 with the beginning of Hitler's war against the Soviet Union? Or did it become truly global only when the Japanese brought the USA into the war at the end of 1941? And what of the long conflict in East Asia beginning with the Japanese aggression in China in the early 1930s and only ending with the triumph of the Chinese Communists in 1949? In *The Oxford Illustrated History of World War Two* a team of leading historians re-assesses the conflict for a new generation exploring the course of the war not just in terms of the Allied response but also from the viewpoint of the Axis aggressor. Under Richard Overy's expert editorial guidance the contributions take us from the genesis of war through the action in the major theatres of conflict by land, sea and air to assessments of fighting power and military and technical innovation, the economics of total war, the culture and propaganda of war and the experience of war and genocide for both combatants and civilians, concluding with an account of the transition from World War to Cold War in the late 1940s. Together they provide a stimulating and thought-provoking new interpretation of one of the most terrible and fascinating episodes in world history

Television in Black-and-white America Alan Nadel,2005 La couverture indique Alan Nadel s new book reminds us that most of the images on early TV were decidedly Caucasian and directed at predominantly white audiences Television did not invent whiteness for America but it did reinforce it as the norm particularly during the Cold War years Nadel now shows just how instrumental it was in constructing a narrow conservative and very white vision of America During this era prime time TV was dominated by adult Westerns with heroes like The Rebel s Johnny Yuma reincarnating Southern values and Bonanza s Cartwright family reinforcing the notion of white patriarchy programs that Nadel shows bristled with Cold War messages even as they spoke to the nation s mythology America had become visually reconfigured as a vast Ponderosa crisscrossed by concrete highways designed to carry suburban white drivers beyond the moral challenge of racism racial poverty and increasingly vocal civil rights demands
