Tps Report:

Critical Points for the Organisation of Test Performance Studies in Microbiology Ana Vučurović, Nataša Mehle, Géraldine Anthoine, Tanja Drešo, Maja Ravník, 2022-08-10 This open access book in the field of plant pest detection shows a constant demand in development and improvement of fast and reliable detection tools especially for high priority pests. This open access book describes and summarizes the whole process of the organization of test performance study TPS for these tools. The outcome of TPS obtained through the evaluation of the performance of one or more diagnostic tests by several laboratories on defined samples is the finding of the best performing test for particular pest and for specific uses. Nowadays the intensification of worldwide trade and associated controls increases the need for quality assurance accreditation and harmonization of laboratories practices. Therefore such studies are very important but non-existent. Considering those facts our goal was to develop guidelines by using the data and experiences of involved partners for further TPS in the field of plant health. Developed guidelines could be easily transferable to other microbiology fields.
