**Losing Reality** Robert Jay Lifton, 2019-10-15 A definitive account of the psychology of zealotry from a National Book Award winner and a leading authority on the nature of cults political absolutism and mind control In this unique and timely volume Robert Jay Lifton the National Book Award winning psychiatrist historian and public intellectual proposes a radical idea that the psychological relationship between extremist political movements and fanatical religious cults may be much closer than anyone thought Exploring the most extreme manifestations of human zealotry Lifton highlights an array of leaders from Mao to Hitler to the Japanese apocalyptic cult leader Shōkō Asahara to Donald Trump who have sought the control of human minds and the ownership of reality Lifton has spent decades exploring psychological extremism His pioneering concept of the Eight Deadly Sins of ideological totalism originally devised to identify brainwashing or thought reform in political movements has been widely quoted in writings about cults and embraced by members and former members of religious cults seeking to understand their experiences In *Losing Reality* Lifton makes clear that the apocalyptic impulse that of destroying the world in order to remake it in purified form is not limited to religious groups but is prominent in extremist political movements such as Nazism and Chinese Communism and also in groups surrounding Donald Trump Lifton applies his concept of malignant normality to Trump's efforts to render his destructive falsehoods a routine part of American life But Lifton sees the human species as capable of regaining reality by means of our protean psychological capacities and our ethical and political commitments as witnessing professionals Lifton weaves together some of his finest work with extensive new commentary to provide vital understanding of our struggle with mental predators *Losing Reality* is a book not only of stunning scholarship but also of huge relevance for these troubled times

***Healing Personal Psychology*** Jasenn Zaejian, 2012-07-10 The mental health professions are responsible for creating and maintaining a folie à deux or shared public delusion that their intention is to heal On close inspection we see that the primary function of mental health professionals is to serve as moral arbiters of human behavior The legislature has granted clinical psychology and psychiatry the legal rights to define certain behaviors as mental illness Behaviors are defined as mental illness by morally tinged personal clinical opinion Cleverly hidden from the public is the fact that the concept of mental illness has never been established by rigorous science to qualify as an illness or disease The concept of mental illness continues to be created or invented by selected moral judgments and committee discussions not science *Healing Personal Psychology* presents an

historical line of development of psychology and psychiatry from its roots in 19th Century German authoritarianism and oppression to the present state of the field where little has changed The clinical gaze is the bedrock of the professions Therein lies the failure of the mental health professions to effectively heal Mainstream clinical psychology and psychiatry by their very natures engage in some of the most repressive practices in modern society Supporting the thesis of this failure with factual references we are taken on an experiential journey through the system to see the devastation mental health treatment has caused by the creation of disease including central nervous system motor neuron and organ diseases found in different studies to range between 10% 75% of all those treated Not to mention the personal ruin caused for millions of people every year by effectively eliminating their freedom of choice to engage in a pleasurable life existence Strategic change exercises effective in healing a range of serious difficulties are presented as a solution to this devastation Valuable resources for healing from surprising sources are illustrated with references for daily practice The author brings more than 30 years of experience to bear in pointing towards a healthy way out This book can be utilized by professionals and the public both as an instructive textbook on alternative healing approaches for psychosis depression anxiety fears phobias obsessive or compulsive behaviors trauma or post traumatic related difficulties and as a resource that documents the system of oppression and inconsistent level of competence in the clinical psychology and psychiatry professions
