## Waec Practical Guide:

Handbook of Research on the Role of Human Factors in IT Project Management Misra, Sanjay, Adewumi, Adewole, 2019-09-27 The role humans play in the field of information technology continues to hold relevance even with the industry's rapid growth. People contribute heavily to the physical, cognitive and organizational domain of computing yet there is a lack of exploration into this phenomenon. Humanoid aspects of technology require extensive research in order to avoid marginalization and insufficient data. The Handbook of Research on the Role of Human Factors in IT Project Management is a collection of innovative research on the methods and applications of the task of human characteristics in the design and development of new technology. While highlighting topics including digitalization, risk management and task analysis, this book is ideally designed for IT professionals, managers, support executives, project managers, managing directors, academicians, researchers and students seeking current research on the dynamics of human influence in technological projects. **The African Book Publishing Record**, 2001 **Annual Conference Proceedings** Science Teachers Association of Nigeria. Conference, 2006 **Academy Congress Publication ...** Nigerian Academy of Education. Congress, 2001 *The News*, 2000 West African Journal of Education, 1974-02 *The Nigerian Academic Forum*, 2007 *Indigenist African Development and Related Issues* Akwasi Asabere-Ameyaw, Jophus Anamuah-Mensah, George Sefa Dei, Kolawole Raheem, 2014-07-11 There is no term so heavily contested in social science literature nomenclature than Development. This book brings Indigenous perspectives to African development. It is argued that contrary to development as we know it, not working a greater part of the problem is that conventional development approaches that work have in fact not truly been followed to the letter and hence the quagmire. All this is ironic since everything we do about our world is development. So how come there is difficult knowledge when it comes to learning from what we know, i.e. what local peoples do and have done for centuries as a starting point to reconstructing and reframing development. In getting our heads around this paradox we are tempted to ask more questions. How do we as African scholars and researchers begin to develop home grown solutions to our problems? How do we pioneer new analytical systems for understanding our communities and offer a pathway to genuine African development, i.e. Indigenist African development? See also Yankah 2004. How do we speak of Indigenist development mindful of global developments and entanglements around us? Can we afford to pursue development still mired in a catch up scenario? Are we in a race with the development world and where do we see this race ending or where do we define as the finishing line?
