Media, 2022-05-25T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 The CEO of the France based technology company Atos SE Thierry Breton announced that he was banning email. In three years time he wanted Atos to be an email zero company. He believed that the volume of emails was polluting his employees working environments and their personal lives. 2 Atos a French company tried to eliminate email usage in order to improve collaboration. They bought another software firm called BlueKiwi and used its technology to build their own social network for the entire enterprise. 3 Many leaders including Thierry Breton, Phil Libin and Jay Simons have banned email to help their employees stay productive and stress free. 4 The experiment showed that employees were more focused and less stressed when they couldn't use email. They noticed this effect and consistently reported feeling more relaxed and focused as well as more productive when their email was shut off.

*Dental Office Design*, 2002 Networks of Design Jonathan Glynne, Fiona Hackney, Minton, Viv, 2010-06 Networks of Design maps a new methodological territory in design studies conceived as a field of interdisciplinary inquiry and practice informed by a range of responses to actor network theory. It brings together a rich body of current work by researchers in the social sciences, technology, material culture, cultural geography, information technology and systems design and design theory and history. This collection will be invaluable to students and researchers in many areas of design studies and to design practitioners receptive to new and challenging notions of what constitutes the design process. Over ninety essays are thematically organised to address five aspects of the expanded notions of mediation, agency and collaboration posited by network theory: Ideas, Things, Technology, Texts and People. The collection also includes an important new essay on rethinking the concept of design by Bruno Latour, one of the most influential figures in the philosophy and sociology of science and technology and a pioneer of actor network theory, and essays deriving from forum discussions involving designers and designer makers responsive to actor network theory. Rather than an anthology of previously published essays, Networks of Design presents work in progress on design theory and its applications. It is the outcome of a live and vigorous debate on the possibilities and actualities offered by actor network led conceptualisations of the relationships and processes constituting design. All the essays many collaborative derive from papers presented at the international conference of the Design History Society held at University College Falmouth UK in the Autumn of 2008.
