GIS and planning. Written in an accessible, non-technical and witty style, this book marks the beginning of the AI revolution in geography with major implications for teaching and research. The authors provide an easy to understand basic introduction to AI relevant to geography. There are no special mathematical and statistical skills needed; indeed, these might well be a hindrance. AI is a different way of looking at the world and it requires a willingness to experiment and readers who are unhindered by the baggage of obsolete technologies and outmoded philosophies of science will probably do best. The text provides an introduction to expert systems, neural nets, genetic algorithms, smart systems and artificial life and shows how they are likely to transform geographical enquiry. A major
