take us Vulture From a brilliant longtime AI insider with intimate access to the world of Sam Altman's OpenAI from the beginning an eye opening account of arguably the most fateful tech arms race in history reshaping the planet in real time from the cockpit of the company that is driving the frenzy When AI expert and investigative journalist Karen Hao first began covering OpenAI in 2019 she thought they were the good guys Founded as a nonprofit with safety enshrined as its core mission the organization was meant its leader Sam Altman told us to act as a check against more purely mercantile and potentially dangerous forces What could go wrong Over time Hao began to wrestle ever more deeply with that question Increasingly she realized that the core truth of this massively disruptive sector is that its vision of success requires an almost unprecedented amount of resources the compute power of high end chips and the processing capacity to create massive large language models the sheer volume of data that needs to be amassed at scale the humans cleaning up that data for sweatshop wages throughout the Global South and a truly alarming spike in the usage of energy and water underlying it all The truth is that we have entered a new and ominous age of empire only a small handful of globally scaled companies can even enter the field of play At the head of the pack with its ChatGPT breakthrough how would OpenAI resist such temptations Spoiler alert it didn't Armed with Microsoft's billions OpenAI is setting a breakneck pace chased by a small group of the most valuable companies in human history toward what end not even they can define All this time Hao has maintained her deep sourcing within the company and the industry and so she was in intimate contact with the story that shocked the entire tech industry Altman's sudden firing and triumphant return The behind the scenes story of what happened told here in full for the first time is revelatory of who the people controlling this technology really are But this isn't just the story of a single company however fascinating it is The g forces pressing down on the people of OpenAI are deforming the judgment of everyone else too as such forces do Naked power finds the ideology to cloak itself no one thinks they're the bad guy But in the meantime as Hao shows through intrepid reporting on the ground around the world the enormous wheels of extraction grind on By drawing on the viewpoints of Silicon Valley engineers Kenyan data laborers and Chilean water activists Hao presents the fullest picture of AI and its impact we've seen to date alongside a trenchant analysis of where things are headed An astonishing eyewitness view from both up in the command capsule of the new economy and down where the real suffering happens Empire of AI pierces the veil of the industry defining our era

Generative AI and Education B. Mairéad Pratschke, 2024-08-27 This volume addresses the gap in knowledge around generative AI and its applications in education It draws on the recent history of technological innovation and digital pedagogies locating generative AI in the contemporary discourse around education futures It argues that a new hybrid model of education is emerging requiring educational institutions to embed generative AI into course and programme design delivery and assessment It also proposes a shift from a focus on learning as output to learning as a process and explores what that shift might look like Grounded in educational theory it offers actionable pedagogy informed guidance on how to position AI as a collaborator in the construction of learning in a manner that is congruent with the values and aims of education It offers advice based on evidence based digital pedagogy including frameworks for effective teaching and learning with generative AI that enable educators and designers to put these ideas into practice The book also explores the wider context informing this shift connecting narratives from governments and industry leaders on the strategic importance of generative AI and lifelong learning learning agility and future skills that make the case for the integration of competency based assessment into mainstream education Finally going beyond pedagogy and practice it considers some of the broader issues including limitations and ethics and the implications of integrating generative AI into institutional planning and design and includes a sample roadmap for education leaders to start the process of integrating generative AI into their institutions This work approaches the topic of generative AI from the vantage point of educators by addressing themes and concerns that

will resonate with professionals in the sector Protecting Information Assets and IT Infrastructure in the Cloud Ravi Das,2023-12-19 This book is a second edition The last one reviewed the evolution of the Cloud important Cloud concepts and terminology and the threats that are posed on a daily basis to it A deep dive into the components of Microsoft Azure were also provided as well as risk mitigation strategies and protecting data that resides in a Cloud environment In this second edition we extend this knowledge gained to discuss the concepts of Microsoft Azure We also examine how Microsoft is playing a huge role in artificial intelligence and machine learning with its relationship with OpenAI An overview into ChatGPT is also provided along with a very serious discussion of the social implications for artificial intelligence
