## **Write For Mathematics:**

How to Write Mathematics Norman Earl Steenrod, 1973-12-31 This classic guide contains four essays on writing mathematical books and papers at the research level and at the level of graduate texts. The authors are all well known for their writing skills as well as their mathematical accomplishments. The first essay by Steenrod discusses writing books either monographs or textbooks. He gives both general and specific advice getting into such details as the need for a good introduction. The longest essay is by Halmos and contains many of the pieces of his advice that are repeated even today. In order to say something well you must have something to say write for someone think about the alphabet. Halmos's advice is systematic and practical. Schiffer addresses the issue by examining four types of mathematical writing research paper, monograph, survey and textbook and gives advice for each form of exposition. Dieudonne's contribution is mostly a commentary on the earlier essays with clear statements of where he disagrees with his coauthors. The advice in this small book will be useful to mathematicians at all levels.

**How to write what you want to say ... in mathematics** Patricia Hipwell, Lyn Carter, 2013-06-25 It is a common fallacy that mathematics does not require students to write. The writing demands of this subject are different from other subjects. The writing must be correct and the mathematics accurate. This book provides students with language in the form of sentence starters, connectives and useful mathematical language to enable them to write correctly. How to write what you want to say in mathematics a guide for students of mathematics who know what they want to say but can't find the words provides parents, teachers and students with a unique tool for improving mathematical writing and suits students from the middle years of schooling to tertiary level.
