Advances in Artificial Intelligence Research Beata Zielosko, Rafał Doroz, Ireneusz Czarnowski, Janusz Kacprzyk, Jacek Mańdziuk, 2026-01-01 This book is a collection of papers related to the latest achievements and development trends in the field of artificial intelligence. This compilation of peer reviewed articles presents both theoretical foundations and innovative algorithms as well as interdisciplinary applications that shape modern intelligent technologies. It serves as a platform for critical academic discussion integrating methodological foundations with the analysis of contemporary AI issues. This book points to many advances topically subdivided into parts related to data mining and machine learning, medical, interdisciplinary and human behaviour applications, neural network and deep learning systems, computer vision, uncertainty in AI, robotics and autonomous systems, problem solving and optimisation, generative AI, decision making and classification in complex systems, and research of young scientist in field of AI. By addressing innovative approaches, implementation, efficiency and responsibility in applications, this book is a valuable source of knowledge for researchers, practitioners and students in technical disciplines.

AI-generated Content Feng Zhao, Duoqian Miao, 2023-11-01 This book constitutes the revised selected papers of the First International Conference AIGC 2023 held in Shanghai, China, during August 25-26, 2023. The 30 full papers included in this volume were carefully reviewed and selected from 62 submissions. The volume focuses on the remarkable strides that have been made in the realm of artificial intelligence and its transformative impact on content creation. As delving into the content of the proceedings, the readers will encounter cutting edge research findings, innovative applications, and thought-provoking insights that underscore the transformative potential of AI-generated content.

The Future of Artificial Intelligence and Robotics David Pastor-Escuredo, Imene Brigui, Nishtha Kesswani, Sushanta Bordoloi, Ashok Kumar Ray, 2024-08-19 This book includes the results from the 5th International Conference on Deep Learning, Artificial Intelligence, and Robotics (ICDLAIR) held in National Institute of Technology Kurukshetra on December 07-09, 2023, which brought together visionaries, researchers, and industry leaders at the forefront of technological innovation. In the rapidly evolving landscape of technology, deep learning, artificial intelligence, and robotics stand as a beacon of innovation and intellectual exchange. Among the myriad of groundbreaking contributions, a notable gem emerges: a forthcoming book that promises to encapsulate the essence of the 5th International Conference on Deep Learning, Artificial Intelligence, and Robotics (ICDLAIR 2023) proceedings. Titled "Progress in AI-Driven Business Decisions: Robotic Process Automation," this publication is poised to become a cornerstone for enthusiasts, researchers, and professionals seeking a comprehensive understanding of the latest advancements in deep learning, artificial intelligence, and robotics. Focused on the theme "Progress in AI-Driven Business Decisions: Robotic Process Automation," the conference showcased groundbreaking developments in the field, exploring the intersection of deep learning, artificial intelligence, AI, and robotics.

Applications, Challenges, and Ethical Implications Fatlind Mazreku,2025-12-10 Scientific Study from the year 2025 in the subject Computer Sciences Artificial Intelligence language English abstract Generative Artificial Intelligence AI refers to algorithms and models capable of producing new content such as text images music or code that mimics or even rivals human creations Recent breakthroughs in model architectures e g transformers and the advent of large scale models like OpenAI s GPT 3 and DALL E have fueled an explosive growth in generative AI s capabilities and public adoption This paper provides an overview of generative AI s rise and its transformative impact across various fields We discuss key applications of generative AI in domains ranging from art and design to software development and medicine highlighting the innovative benefits it brings

such as enhanced creative productivity and new problem solving tools At the same time we examine the challenges and ethical concerns emerging from generative AI s widespread use issues of bias misinformation intellectual property and misuse that have become increasingly urgent We also analyze the current technical limitations of generative AI including accuracy interpretability and resource demands and consider future outlooks for the technology The findings underscore that while generative AI offers unprecedented opportunities and innovations careful consideration of its ethical implications and proactive governance is essential to ensure it is developed and used responsibly In conclusion generative AI stands as a powerful tool that is reshaping creativity industry and society and its continued evolution will depend on balancing its benefits with diligent management of its risks
