Clinical Psychology David C.S. Richard,Steven K. Huprich,2011-09-02 Clinical Psychology is a graduate level introduction to the field of clinical psychology While most textbooks focus on either assessment treatment or research this textbook covers all three together specifically for the introductory level graduate course Chapter coverage is diverse and contributors come from both PhD and PsyD programs and a variety of theoretical orientations Chapter topics cover the major

activities of the contemporary clinical psychologist with an introduction focusing on training models The book has a mentoring style designed to highlight the relevance of the topics discussed to clinicians in training Assessment and treatment chapters focus on evidence based practice comparing and contrasting different options the basis for clinical choice between them and efficacy of same It will also introduce the business and ethical aspects of the clinical career that current introductory books do not include such ethics in assessment treatment and research third party payers technological developments dissemination of research findings cross cultural issues and the future of the profession The text is designed for students in their first year of clinical psychology graduate training Includes assessment treatment and practice issues Compares and contrasts different therapeutic styles Exemplifies practical application through case studies Focuses on evidence based practice Orients future clinicians to contemporary issues facing psychological practices **Student-staff Directory** University of Minnesota,1981 **Educational Debt Burden and Career Choice** Erica Marie Field,2006 This paper examines the influence of educational debt aversion on the career choice of law school students including the decision to attend law school and the decision to work in public interest law To isolate the role of debt aversion I analyze experimental data from NYU Law School s Innovative Financial Aid Study in which two career contingent financial aid packages were randomly assigned to participating admits Because the packages had equivalent monetary value and differed only in the duration of indebtedness differences in career choices associated with financial aid assignment can be attributed to psychological debt aversion The results indicate that debt aversion matters In classes for which the lottery was announced prior to enrollment participants randomly assigned to the low debt package are nearly twice as likely to enroll In classes without selective matriculation lottery winners have a 36 45% higher rate of first job placement in public interest law Both results are consistent with a simple model of debt aversion in which psychic costs of holding debt during and after school generate differences in the discounted lifetime utility of the financial aid packages and hence in the value of attending law school and of working in public interest law National Bureau of Economic Research web site
