**New Media and Visual Communication in Social Networks** Kir, Serpil, 2019-08-30. Social media and new social facilities have made it necessary to develop new media design processes with different communication strategies in order to promote sustainable communication. Visual communication emphasizes messages that are transmitted through visual materials in order to effectively communicate emotions, thoughts, and concepts using symbols instead of words. Social networks present an ideal environment for utilizing this communication technique. *New Media and Visual Communication in Social Networks* is a pivotal scholarly publication that examines communication strategies in the context of social media and new digital media platforms and explores the effects of visual communication on social networks, visual identity, television, magazines, newspapers, and more. Highlighting a range of topics such as consumer behavior, visual identity, and digital pollution, this book is essential for researchers, practitioners, entrepreneurs, policymakers, and educators.

*Flexible Ridesharing* Volker Handke, Helga Jönuschat, 2012-12-14. Individual mobility is one of the most important needs of modern society and an important link between private, public, and economic life. In contrast, transport also entails severe environmental and social burdens, foiling current efforts for sustainable development. As the main source of CO<sub>2</sub> emissions, transport is a prominent driver for climate change, and individual car traffic is responsible for nearly a third of the total energy consumption. However, we have to consider that many commuters feel indeed very dependent on their car. Here, ridesharing promises to contribute to environmental protection while still offering individual mobility. Although ridesharing options have been discussed since many years, internet and smartphones provide completely new opportunities to find ridesharing partners today. Thus, this book deals with current efforts on implementing flexible internet and phone-based ridesharing services. With a main focus on the user's perspective, their demands, and acceptance limits, we aim to explore success factors for non-profit but also commercial ridesharing concepts.
