Emerging Technologies in Data Mining and Information Security João Manuel R. S. Tavares, Satyajit Chakrabarti, Abhishek Bhattacharya, Sujata Ghatak, 2021-05-04 This book features research papers presented at the International Conference on Emerging Technologies in Data Mining and Information Security IEMIS 2020 held at the University of Engineering Management Kolkata India during July 2020. The book is organized in three volumes and includes high quality research work by academicians and industrial experts in the field of computing and communication including full length papers, research in progress papers and case studies related to all the areas of data mining, machine learning, Internet of things, IoT and information security. **ReasonML Quick Start Guide** Raphael Rafatpanah, Bruno Joseph D'mello, 2019-02-28 ReasonML also known as Reason is a new syntax and toolchain for OCaml that was created by Facebook and is meant to be approachable for web developers. Although OCaml has several resources, most of them are from the perspective of systems development. This book alternatively explores Reason from the perspective of web development.

Neutrosophic Sets and Systems, vol. 77/2025 Florentin Smarandache, Mohamed Abdel-Basset, Maikel Leyva-Vázquez, 2025-01-31 Neutrosophic Sets and Systems has been created for publications on advanced studies in neutrosophy, neutrosophic set, neutrosophic logic, neutrosophic probability, neutrosophic statistics that started in 1995 and their applications in any field such as the neutrosophic structures developed in algebra, geometry, topology, etc. Neutrosophy is a new branch of philosophy that studies the origin, nature, and scope of neutralities as well as their interactions with different ideational spectra. This theory considers every notion or idea together with its opposite or negation and with their spectrum of neutralities in between them, i.e., notions or ideas supporting neither nor the other ideas together are referred to as Neutrosophy. Neutrosophy is a generalization of Hegel's dialectics, the last one is based on and only According to this theory, every idea tends to be neutralized and balanced by other ideas as a state of equilibrium. In a classical way, they are disjoint two by two. But since in many cases the borders between notions are vague, imprecise, and Sorites, it is possible that they and of course have common parts two by two or even all three of them as well. Neutrosophic Set and Neutrosophic Logic are generalizations of the fuzzy set and respectively fuzzy logic, especially of intuitionistic fuzzy set and respectively intuitionistic fuzzy logic. In neutrosophic logic, a proposition has a degree of truth T, a degree of indeterminacy I, and a degree of falsity F, where T, I, F are standard or non-standard subsets of {0, 1}. Neutrosophic Probability is a generalization of the classical probability and imprecise probability. Neutrosophic Statistics is a generalization of the classical statistics. [Application of Optimization in Production, Logistics, Inventory, Supply Chain Management and Block Chain](#) Biswajit Sarkar, Mitali Sarkar, 2020-04-23 The evolution of industrial development since the 18th century is now experiencing the fourth industrial revolution. The effect of the development has propagated into almost every sector of the industry. From inventory to the circular economy, the effectiveness of technology has been fruitful for industry. The recent trends in research with new ideas and methodologies are included in this book.

Several new ideas and business strategies are developed in the area of the supply chain management logistics optimization and forecasting for the improvement of the economy of the society and the environment The proposed technologies and ideas are either novel or help modify several other new ideas Different real life problems with different dimensions are discussed in the book so that readers may connect with the recent issues in society and industry The collection of the articles provides a glimpse into the new research trends in technology business and the environment [The Unofficial Guide Walt Disney World 2010](#) Bob Sehlinger,2009-08-18 In 2008 combined Walt Disney World Resort theme park attendance reached over 51 million with the Magic Kingdom alone drawing over 17 million visitors Orlando Convention and Visitor Bureau Despite significant downturns in the economy Disney theme parks have maintained attendance rates and made gains in attendance at some parks Walt Disney World Resort theme parks are rated best in the world earning high marks for things outside of the traditional theme park experience Epcot's International Food Wine Festival which takes place for six weeks every fall and showcases food from twenty five countries was rated by Forbes Traveler as one of the Best U S Food and Wine Festivals
