**Beginning Google Maps Applications with Rails and Ajax** Andre Lewis,Cameron Turner,Jeffrey Sambells,Michael Purvis,2007-05-02 The Google Maps API remains one of the showcase examples of the Web 2.0 development paradigm Beginning Google Maps Applications with Rails and Ajax From Novice to Professional is the first book to comprehensively introduce the service from a developer perspective showing you how you can integrate mapping features into your Rails driven web applications Proceeding far beyond simplistic map display you'll learn how to draw from a variety of data sources such as the U.S. Census Bureau's TIGER Line data and Google's own geocoding feature to build comprehensive geocoding services for mapping many locations around the world The book also steers you through various examples that show how to encourage user interaction such as through pinpointing map locations adding comments and building community driven maps You'll want to pick up a copy of this book because This is the first book to comprehensively introduce the Google Maps application development using the Rails development framework You'll be introduced to the very latest changes to the Google Maps API embodied in the version 2 release It is written by four developers actively involved in the creation of location based mapping services For additional info please visit the author's reference site for this book **Google Maps Hacks** Rich Gibson,Schuyler Erle,2006-01-17 Want to find every pizza place within a 15 mile radius Where the dog parks are in a new town The most central meeting place for your class club or group of friends The cheapest gas stations on a day to day basis The location of convicted sex offenders in an area to which you may be considering moving The applications serendipitous and serious seem to be infinite as developers find ever more creative ways to add to and customize the satellite images and underlying API of Google Maps Written by Schuyler Erle and Rich Gibson authors of the popular Mapping Hacks Google Maps Hacks shares dozens of tricks for combining the capabilities of Google Maps with your own datasets Such diverse information as apartment listings crime reporting or flight routes can be integrated with Google's satellite imagery in creative ways to yield new and useful applications The authors begin with a complete introduction to the standard features of Google Maps The adventure continues with 60 useful and interesting mapping projects that demonstrate ways developers have added their own features to the maps After that's given you ideas of your own you learn to apply the techniques and tools to add your own data to customize and manipulate Google Maps Even Google seems to be tacitly blessing what might be seen as unauthorized use but maybe they just know a good thing when they see one With the tricks and techniques you'll learn from Google Maps Hacks you'll be able to adapt Google's satellite map feature to create interactive maps for personal and commercial applications for businesses ranging from real estate to package delivery to home services transportation and more Includes a foreword by Google Maps tech leads Jens and Lars Rasmussen [Beginning Google Maps Applications with PHP and Ajax](#) Jeffrey Sambells,Michael Purvis,Cameron Turner,2007-12-22 Until recently building interactive web based mapping applications has been a cumbersome affair This changed when Google released its powerful Maps API Beginning

Google Maps Applications with PHP and Ajax was written to help you take advantage of this technology in your own endeavors whether you're an enthusiast playing for fun or a professional building for profit. This book covers version 2 of the API including Google's new Geocoding service. Authors Jeffrey Sambells, Cameron Turner and Michael Purvis get rolling with examples that require hardly any code at all but you'll quickly become acquainted with many facets of the Maps API. They demonstrate powerful methods for simultaneously plotting large data sets, creating your own map overlays and harvesting and geocoding sets of addresses. You'll see how to set up alternative tile sets and where to access imagery to use for them. The authors even show you how to build your own geocoder from scratch for those high volume batch jobs. As well as providing hands on examples of real mapping projects this book supplies a complete reference for the Maps API along with the relevant aspects of JavaScript, CSS, PHP and SQL. Visit the authors website for additional tips and advice.

#### Digital Methods

Richard Rogers, 2013-05-10 A proposal to repurpose Web native techniques for use in social and cultural scholarly research. In *Digital Methods* Richard Rogers proposes a methodological outlook for social and cultural scholarly research on the Web that seeks to move Internet research beyond the study of online culture. It is not a toolkit for Internet research or operating instructions for a software package; it deals with broader questions. How can we study social media to learn something about society rather than about social media use? Rogers proposes repurposing Web native techniques for research into cultural change and societal conditions. We can learn to reapply such methods of the medium as crawling and crowd sourcing, PageRank and similar algorithms, tag clouds and other visualizations. We can learn how they handle hits, likes, tags, date stamps and other Web native objects. By thinking along with devices and the objects they handle, digital research methods can follow the evolving methods of the medium. Rogers uses this new methodological outlook to examine such topics as the findings of inquiries into 9/11 search results, the recognition of climate change skeptics by climate change related Web sites and the censorship of the Iranian Web. With *Digital Methods* Rogers introduces a new vision and method for Internet research and at the same time applies them to the Web's objects of study from tiny particles, hyperlinks to large masses, social media.
