**The Para Fitness Guide** Sam McGrath, 2012-07-20 In 'The Para Fitness Guide', Major Sam McGrath of the legendary Parachute Regiment has collected together an inspirational series of exercises which are perfect for anyone. Every year getting fit and losing weight is at the top of the list of resolutions but few of us manage to stick to any kind of fitness regime. What you need is a military instructor watching over your exercise programme helping you out and encouraging you along the way. Unfortunately we can't supply you with your own personal fitness expert but this book is the next best thing. Sam offers advice on how to choose a gym, eat well, prepare for exercise, warm up and how to warm down to reduce the impact of all of those aches and pains. The book also sets out six challenges for readers to aim for as they follow this programme including a 10 mile race and the grueling 'Fan Dance' around the Brecon Beacons. Recession proof your fitness programme with our accompanying iPhone app - have Major Sam McGrath as your own personal portable trainer on your mobile device. The updated app now features the 'Emperor Training' programme pushing your quest for fitness further with weight training. With our help you can be fighting fit in time for your summer hols.

**digitalSTS** Janet Vertesi, David Ribes, 2019-05-07 New perspectives on digital scholarship that speak to today's computational realities. Scholars across the humanities, social sciences, and information sciences are grappling with how best to study virtual environments, use computational tools in their research, and engage audiences with their results. Classic work in science and technology studies (STS) has played a central role in how these fields analyze digital technologies, but many of its key examples do not speak to today's computational realities. This groundbreaking collection brings together a world-class group of contributors to refresh the canon for contemporary digital scholarship. In twenty-five pioneering and incisive essays, this unique digital field guide offers innovative new approaches to digital scholarship, the design of digital tools and objects, and the deployment of critically grounded technologies for analysis and discovery. Contributors cover a broad range of topics including software development, hackathons, digitized objects, diversity in the tech sector, and distributed scientific collaborations. They discuss methodological considerations of social networks and data analysis, design projects that can translate STS concepts into durable scientific work, and much more. Featuring a concise introduction by Janet Vertesi and David Ribes and accompanied by an interactive microsite, this book provides new perspectives on digital scholarship that will shape the agenda for tomorrow's generation of STS researchers and
