Machine Learning and Artificial Intelligence in Radiation Oncology Barry S. Rosenstein, Tim Rattay, John Kang, 2023-12-02  
Machine Learning and Artificial Intelligence in Radiation Oncology A Guide for Clinicians is designed for the application of practical concepts in machine learning to clinical radiation oncology. It addresses the existing void in a resource to educate practicing clinicians about how machine learning can be used to improve clinical and patient centered outcomes. This book is divided into three sections: the first addresses fundamental concepts of machine learning and radiation oncology, detailing techniques applied in genomics; the second section discusses translational opportunities such as in radiogenomics and autosegmentation; and the final section encompasses current clinical applications in clinical decision making, how to integrate AI into workflow use cases and cross collaborations with industry. The book is a valuable resource for oncologists, radiologists, and several members of the biomedical field who need to learn more about machine learning as a support for radiation oncology. Presents content written by practicing clinicians and research scientists, allowing a healthy mix of both new clinical ideas as well as perspectives on how to translate research findings into the clinic. Provides perspectives from artificial intelligence AI industry researchers to discuss novel theoretical approaches and possibilities on academic collaborations. Brings diverse points of view from an international group of experts to provide more balanced viewpoints on a complex topic.
