*Planet Alicia* Alexis Sixela, 2008-10-20 Traveling to another planet is also a trip inside It makes you pay a visit to some corners of your brain that are not always in working order At home everything has a length a width and a depth This is our cubist environment The stars above don t seem to have any use for our straight lines right angles and flat surfaces You don t have to go far to see that our so called normal way of thinking is only a first approximation Len our photographer fell in love on Planet Alicia That was more than he expected He went there with the idea that love is something that he produces and gives away Now he sees lovers as those double stars going through the universe dancing around each other united by their distance The transition was not easy He nearly died We went there convinced that we are the master of our ship I came
