Emerging Computer Technologies 2 Ömer Aydın, Radosveta Sokullu, Özkan Akın, Erginay Aslan, Oliver Simonoski, Ninoslav Marina, Natasa Paunkoska (Dimoska), Izabela Mitreska, Mustafa Ceyhan, Enis Karaarslan, 2022-12-31 There is rapid development and change in the field of computer science today. These affect all areas of life. Emerging topics in computer science are covered in this book. In the first chapter a specific IoT application called a smart mailbox with face recognition which uses cellular connectivity and image processing to securely deliver valuable documents. The prototype for this system includes a fingerprint reader camera electromagnetic lock and various other components connected to an Arduino Uno and a Raspberry Pi and uses OpenCV and Python software for face detection and recognition. In the second chapter authors compares and evaluates the main characteristics of 5G channels and the performance of two channel coding candidates low density parity check LDPC codes and polar codes. The analysis considers block error rate bit error rate computational complexity and flexibility and finds that polar codes outperform LDPC code systems though LDPC is still a viable option compared to other code systems. The third chapter focuses on how to reliably process and store DNA sequences in EHR systems without any modifications. To achieve this the authors introduce a coding technique and evaluate its effectiveness using the Hamming code and Reed Solomon coding schemes on a sample data set. The results show that the Reed Solomon coding scheme outperforms the Hamming code in terms of error detection and correction for securely processing DNA records to EHR systems. The next chapter investigates

the robustness of AI models trained on thyroid ultrasound images using different convolutional neural network CNN architectures VGG19 Xception ResNet50V2 and EfficientNetB2 against adversarial attacks using the fast gradient sign method FGSM basic iterative method BIM and projected gradient descent PGD techniques In the fifth chapter it was questioned whether artificial intelligence could write an academic article In this direction an academic article was created and evaluated by OpenAI ChatGPT The final chapter proposes an application to measure RF signal intensities in urban areas and use that information to estimate the amount of energy that can be harvested from these signals This information is then presented to users through a geographical information system

age providing informed consent online has never been more challenging Countless companies collect and share our personal data through devices apps and websites fuelling a growing data economy and the emergence of surveillance capitalism Few of us have the time to read the associated privacy policies and terms and conditions and thus are often unaware of how our personal data are being used This is a problem as in the last few years large tech companies have abused our personal data As privacy self management through the mechanism of providing online consent has become increasingly difficult some have argued that surveillance capitalism and the data economy more broadly need to be overthrown This book presents a different perspective It departs from the concept of revolutionary change to focus on pragmatic incremental solutions tailored to everyday contexts It scrutinises how consent is currently sought and provided online and offers suggestions about how online consent practices can be improved upon These include the possibility of subjecting consent gathering practices to ethics committees for review the creation of visual based consent agreements and privacy policies to help with transparency and engagement the development of software to protect privacy and the idea of automated consent functionalities that allow users to bypass the task of reading vast amounts of online consent agreements The author suggests that these small scale changes to online consent obtaining procedures could if successfully implemented provide us with a way of self managing our privacy in a way that avoids a revolutionary dismantling of the data economy In the process readers are encouraged to rethink the very purpose of providing informed consent online Rethinking Informed Consent in the Big Data Age will appeal to researchers in normative ethics applied ethics philosophy of law and the philosophy of AI It will also be of interest to business scholars communication researchers students and those in industry **"Looks Good to Me"** Adrienne
