Ulrich von Weizsäcker**

Walking The Talk The Business Case For Sustainable Development:

Walking the Talk Charles O. Holliday, Stephan Schmidheiny, Philip Watts, 2002 Argues that the solving of environmental social problems is essential for future growth cover *Walking the Talk* Charles O. Holliday, 2017 Ten years on from the Rio Earth Summit world leaders will gather again in Johannesburg for the World Summit on Sustainable Development in September As planetary anxieties about globalization poverty and climate change grow where does the international business community stand Are they a barrier to change or an engine for it One outcome of Rio was Changing Course the hugely influential book by Swiss industrialist Stephan Schmidheiny which argued that business needed to be part of the solution to global environmental degradation Now Schmidheiny has joined with fellow prime movers in the World Business Council for Sustainable Development WBCSD the key business organization focusing on policy research and development in this crucial area Chad Holliday Chairman and CEO of DuPont and Philip Watts Chairman of Shell to spell out the real business case for addressing sustainable development as a key strategic issue The results are ground breaking For the first time leading industrialists are arguing that not only is sustainable development good for business the solving of environmental and social problems is essential for future growth Drawing on a wealth of case studies and personal interviews from business leaders operating around the world *Walking the Talk* clearly demonstrates that the vanguard who have operationalized leading edge environmental and social initiatives are benefiting in a myriad of ways that benefit the bottom line and the planet The book argues that the time for rhetoric is over The business of business has changed Even more remarkably the authors insist that a global partnership between governments business and civil society is essential if accelerating moves towards globalization are to maximize opportunities for all especially the world's poor As Chad Holliday recently stated in an address to the United Nations Given existing technology and products for all six billion people on the planet to live like the average American we would require the equivalent of three planet Earths to provide the material create the energy and dispose of the waste Such an option is evidently not available and the book argues that far more eco efficient and socially equitable modes of development must be pursued in order to allow poorer nations to raise their standards of living The solution provided by *Walking the Talk* is to mobilize markets in favour of sustainability leveraging the power of innovation and global markets for the benefits of everyone not just the developed world This means a further liberalization of the market a move that would be condemned by anti globalization protestors Yet as the authors argue business cannot succeed in failing societies When the global market fails poor countries where most of the world's people live it will also eventually fail business Subsidies for rich countries products and tariffs against poor countries products do not constitute a free market or one that best serves people or business Similarly governments cannot subsidize fossil fuels or water and expect businesses or ordinary citizens to use them efficiently So a new fair and equitable market is needed A market that can work for all The authors therefore call on protestors against globalization to stop protesting against the market and instead to campaign instead against the perverse

policies that impoverish people and their environment Walking the Talk explores the opportunities and challenges inherent in eco efficiency producing more with less corporate social responsibility and a transparent wired world where reputations can be irreversibly damaged or enhanced in real time It also devotes a chapter to ways in which corporations can and must learn to change It examines the new partnerships needed among companies governments and civil society to produce real change and the ways in which these alliances can work for all concerned And it argues that consumer choice and consumer information should be encouraged as a positive force for sustainable development Only what is valued is carefully used and so creating markets for environmental goods and services may be the best way to protect scarce resources This is especially true in efforts to mitigate the effects of climate change where business like approaches such as the development of carbon trading offer workable solutions to policy makers Whether small medium or large all businesses must innovate and change to meet the social and environmental challenges of the coming years Walking the Talk provides a broad set of proven roadmaps to success as well as real life inspiration for business to embrace the real challenge to build a global economy that works for all the world s people Provided by publisher Walking the Talk Jr, Charles O. Holliday,Stephan Schmidheiny,Philip Watts,2017-10-19 The authors argue the business case for sustainable development in this study that explores a range of issues beginning with corporate social responsibility and ending with eco efficiency **Becoming Part of the Solution** Bill Wallace,2005-01-01 **Transforming Sustainability Strategy into Action** Beth Beloff,Marianne Lines,Dicksen Tanzil,2005-10-13 A highly informative and brilliant contribution to the growingsustainability literature Dr Brian and Mary Natrass Managing Partners of SustainabilityPartners and authors of The Natural Step for Business and Dancingwith the Tiger The goal of sustainable development a recent focus in thecorporate world is to ensure a better quality of life foreveryone today and in generations to come The challenge facingindustry leaders is how to reconcile economically competitivestrategies with environmentally sound and socially responsiblepractices Transforming Sustainability Strategy into Action The ChemicalIndustry presents proven practical techniques to help managers inthe chemical industry identify and assess options for improving thesustainability of their organizations with a pragmatic emphasis onoperational aspects decision support and guidelines for measuringprogress Employing a systematic approach and introducing globallyproven problem solving and decision making tools designed toprovoke questioning and creative thinking the authors address someof the most challenging issues for the industrial worldtoday The authors combined expertise and extensive experience intranslating sustainability strategies from theory into action makethem uniquely qualified to deliver the kind of hands on responsivebusiness solutions that will give corporate leaders the competitiveedge in preparing for tomorrow s socially and environmentallyconscious marketplace Moral Capitalism Stephen Young,2003-12-03 The world is drifting without a clear plan for its economic development Communism is dead but in the wake of Enron and similar scandals many see capitalism as amoral and too easily abused A blueprint for progress is needed and Moral Capitalism provides one Moral Capitalism is

based on principles developed by the Caux Round Table an extraordinary international network of top business executives who believe that business can and must weigh both profit and principle Caux Round Table's global chair Stephen Young argues that the ethical standards inherent in capitalism have been compromised by cultural values inimical to capitalism's essentially egalitarian rational spirit and distorted by the short sighted dog eat dog doctrines of social Darwinism into what he calls brute capitalism He demonstrates how the Caux Round Table's Seven General Principles for Business can serve as a blueprint for a new moral capitalism and explores in detail how if guided by these principles capitalism is really the only system with the potential to reduce global poverty and tyranny and address the needs and aspirations of individuals societies and nations

Spiritual Capital Danah Zohar,Ian Marshall,2004-04-11 Spiritual Capital presents a new vision of capitalist society that transcends the greed materialism and meaninglessness so rampant today It offers an idea of wealth profit and capital that's about more than simply money

Grassroots Development ,2002

The Business of Sustainable Development in Africa Ralph Hamann,Stu Woolman,Courtenay Sprague,2008 This book is about enhancing the contribution of business to sustainable development in sub Saharan Africa with an emphasis on both challenges and opportunities Sub Saharan Africa is the only region in the world where the proportion of extremely poor people increased during the final decades of the previous century The overarching imperative to support Africa's poor in their quest for better livelihoods human rights and environmental integrity is a huge challenge and the business community has an important role to play The purpose of this book is to contribute to a better understanding of this role and its implications for decision makers in business as well as to some extent government and civil society Publisher's description

Governance and Sustainability Ulrich Petschow,James Rosenau,Ernst Ulrich von Weizsäcker,2017-09-29 Sustainability cannot be achieved without good governance The Johannesburg World Summit on Sustainable Development in 2002 stated that governance and sustainable development are intimately tied together and the future role and architecture of institutions from local to international levels will be crucial determinants to whether future policies and programmes for sustainable development will succeed But these are changing times With growing tensions over both globalization and regionalization traditional systems of regulation are being subjected to growing pressure for reform While states will continue to play a significant if changed role in the future the importance of players from business and civil society is increasing Sustainable development requires this change Such an intra and intergenerational concept cannot be achieved with a top down approach but rather needs the participation of all In fact the governance of sustainable development requires the exploration of new forms of both social co operation and confrontation By doing so the different levels global and local players state company and civil society control structures hierarchy market and public private and fields of action need to be taken into consideration Governance and Sustainability examines the possibilities of integrating the environmental social and economic dimensions of sustainable development within the framework of governance processes and how that might steer societies towards sustainability It takes a close look

at the key actors their agendas and methods forms of organization problems and limits as well as real life examples for governance in different areas of society at the regional national and international level It is especially interested in exploring the nature of changes in the context of governance the role of actors in such processes and analysing how different forms of societal learning can improve governance processes It concludes that this is a continuous process characterized by conflicts and learning processes necessary to heighten both awareness of the complexity of the social and environmental problems faced and the prospects of implementing successful solutions Based on a major conference hosted to assess the issue of governance post Johannesburg the book includes innovative insights from some of the leading thinkers in both sustainable development and governance from academia business multilateral organizations and NGOs It provides a unique perspective on two of the key societal problems facing the world today *Governance for Sustainable Development* William M. Lafferty, 2004 This is a study on the challenge of implementing sustainable development in Western democracies Given that sustainable development involves a number of new challenges for strategic governance the authors examine how these obstacles can be overcome in different political contexts **Peace Research Abstracts Journal**, 2004 *Human Insecurity in a Global World* Lincoln C. Chen, Sakiko Fukuda-Parr, Ellen Seidensticker, 2003 This book explores the complex challenges that globalization poses for human security many of which are already high on the agenda of the international community By adding a human security dimension to their analysis the authors provide new insight into attempts to reduce our vulnerability to the new forces unleashed by global changes California Management Review, 2014 **Global Regionalization** H. S. Geyer, 2006 Examines the political and economic changes that have reshaped the political geography of certain regions This book deals with the concept of global bloc formation examining the impacts that political economic conditions and relationships in and between nations have on demographic and economic flows Creating Value Vernon D. Swaback, 2007 This groundbreaking book argues convincingly that financial success in real estate development will increasingly require design that is smarter greener and more sustainable It also provides examples of how this can be incorporated into a wide variety of real estate development projects **William and Mary Environmental Law and Policy Review**, 2006 **Global Compact Membership and the Automobile Industry** Oliver Ziegler, 2008 The Global Compact GC is a multistakeholder initiative that was introduced in 1999 by former United Nations Secretary General Kofi Annan The initiative aims at filling the governance void of the global economy While 47% of the 2659 participating companies are based in Europe U S American companies constitute only 3% of the business participants This book analyzes reasons for joining or not joining the Global Compact Six determinants are used to analyze a company's decision to join or not to join the initiative they are the consumer's employee's and shareholder's expectations the feasibility of the Compact's requirements the company's world view regarding the United Nations as well as Corporate Social Responsibility and finally the CEO's information regarding litigation risk In addition companies compliance with the Global Compact's principles or alternative

initiatives is assessed by using a compliance model taken from IR theory
Doing Business with the Poor Lloyd Timberlake, 2004
