house throughout history in every place in the world has been built to provide shelter from the elements The dwellings that
have resulted are as different as the people that have built them the social norms that prevailed at the time and place in
which they were built and the natural environment that they adapted to Studying them now in a comprehensive way allows

Koerte,2025-02-21 This study describes how Walter Gropius of former Bauhaus fame transformed himself from the image of
the omnipotent Master Builder to the humble Grope of later years Having come as an emigree from his native Germany to
the US he had to cope with quite a different office culture based on teamwork Not the single genius but a collective approach
to problem solving was the order of the day coupled with a conciliatory manner of debate among equals With that his
legendary firm The Architects Collaborative called TAC for short in Boston was to become the star of the profession in the
USA over the course of some 50 years Thanks to the combined talent and vigorous input of seven younger partners the firm
succeeded in gaining large commissions at home and internationally The well designed school and campus buildings in New
England found their equivalent in large university projects such as in Baghdad and Tunisia Internally the special aura at TAC
was personified by a strong collective spirit of individuals in their own right In turn the office attracted a highly motivated
staff of apprentices from all around the world Grope s personal charm his humor and encouragement of young people got
him life long affection Not the least his pledge for the role of women in the profession left its mark on a whole new
generation of architects offices to follow The author was a member of this team from 1962 to 1964 and kept in touch with
Grope until his death in 1969 An eye witness account setting straight TAC s merits to Mid Century Modernism **The**
