

SPACE AND THE AMERICAN IMAGINATION

HOWARD E. McCURDY

Space And The American Imagination

Frank Wenzel Langer

Space And The American Imagination:

Space and the American Imagination Howard E. McCurdy, 2011-03 People dreamed of cosmic exploration winged spaceships and lunar voyages space stations and robot astronauts long before it actually happened Space and the American Imagination traces the emergence of space travel in the popular mind its expression in science fiction and its influence on national space programs Space exploration dramatically illustrates the power of imagination Howard E McCurdy shows how that power inspired people to attempt what they once deemed impossible In a mere half century since the launch of the first Earth orbiting satellite in 1957 humans achieved much of what they had once only read about in the fiction of Jules Verne and H G Wells and the nonfiction of Willy Ley Reaching these goals however required broad based support and McCurdy examines how advocates employed familiar metaphors to excite interest promising for example that space exploration would recreate the American frontier experience and prepare the public for daring missions into space When unexpected realities and harsh obstacles threatened their progress the space community intensified efforts to make their wildest dreams come true This lively and important work remains relevant given contemporary questions about future plans at NASA Fully revised and updated since its original publication in 1997 Space and the American Imagination includes a reworked introduction and conclusion and new chapters on robotics and space commerce

Space and the American Imagination National Aeronautics and Space Administration (NASA), 2018-07-10 The introduction will set out the principal theme of the book that the rise of the U S space program was due to a concerted effort by science writers engineers industrialists and civic and political leaders to create a popular culture of space exploration based on important elements of American social life such as frontier mythology fears about the cold war and the rise of the consumer culture Much of the disillusionment with the NASA space program which set in during the third decade of space flight can be traced to a widening gap between popular expectations and the reality of space exploration McCurdy Howard E Unspecified Center *The Influence of Space on the American Imagination* Gay Wilson Allen, Clarence Gohdes, 1967

SPACE & AMERN IMAGINATION MC CURDY HOWARD E, 1997-10-17 Examining popular images that have helped motivate the most ambitious civil space program in the world Howard E McCurdy argues that the spacefaring dream tapped into several of America s most deeply rooted cultural ideals the limitless frontier the heroic explorer the romance of aviation and progress through technology He also shows how space advocates playing on the public s Cold War fears convinced politicians that control of space meant control of the earth Their campaign helps to explain why President Kennedy approved the expensive Project Apollo leading to the space program s most visible success the 1969 moon landing Forty years after the launch of the first orbiting satellites U S achievements in space have fallen far short of the hopeful visions encouraged by Chesley Bonestell s paintings in Collier s magazine and television shows such as Star Trek In Space and the American Imagination McCurdy contends that the gap between expectations and reality led to waning public support for the space program and argues that such gaps typically arise when

public policy debates are obliged to entertain as well as inform

Space And The American Imagination, (NASA-CR-196131), 31 May 1994 , Space, Time, and Aliens Steven J. Dick, 2020-05-11 In this comprehensive and interdisciplinary volume former NASA Chief Historian Steven Dick reflects on the exploration of space astrobiology and its implications cosmic evolution astronomical institutions discovering and classifying the cosmos and the philosophy of astronomy The unifying theme of the book is the connection between cosmos and culture or what Carl Sagan many years ago called the cosmic connection As both an astronomer and historian of science Dr Dick has been both a witness to and a participant in many of the astronomical events of the last half century This collection of papers presents his reflections over the last forty years in a way accessible to historians philosophers and scientists alike From the search for alien life to ongoing space exploration efforts readers will find this volume full of engaging topics relevant to science society and our collective future on planet Earth and beyond

Imagining Outer Space Alexander C.T. Geppert, 2018-04-25 Imagining Outer Space makes a captivating advance into the cultural history of outer space and extraterrestrial life in the European imagination How was outer space conceived and communicated What promises of interplanetary expansion and cosmic colonization propelled the project of human spaceflight to the forefront of twentieth century modernity In what way has West European astroculture been affected by the continuous exploration of outer space Tracing the thriving interest in spatiality to early attempts at exploring imaginary worlds beyond our own the book analyzes contact points between science and fiction from a transdisciplinary perspective and examines sites and situations where utopian images and futuristic technologies contributed to the omnipresence of fantasmatic thought Bringing together state of the art work in this emerging field of historical research the volume breaks new ground in the historicization of the Space Age

The Smithsonian History of Space Exploration Roger D. Launius, 2018-10-23 The first in depth fully illustrated history of global space discovery and exploration from ancient times to the modern era The Smithsonian History of Space Exploration examines civilization s continued desire to explore the next frontier as only the Smithsonian can do it Buzz Aldrin Gemini 12 and Apollo 11 astronaut and author of No Dream Is Too High Former NASA and Smithsonian space curator and historian Roger D Launius presents a comprehensive history of our endeavors to understand the universe honoring millennia of human curiosity ingenuity and achievement This extensive study of international space exploration is packed with over 500 photographs illustrations graphics and cutaways plus plenty of sidebars on key scientific and technological developments influential figures and pioneering spacecraft Starting with space exploration s origins in the pioneering work undertaken by ancient civilizations and the great discoveries of the Renaissance thinkers Launius also devotes whole chapters to our space race to the Moon space planes and orbital stations and the lure of the red planet Mars He also offers new insights into well known moments such as the launch of Sputnik 1 and the Apollo Moon landing and explores the unexpected events and hidden figures of space history The final chapters cover the technological and mechanical breakthroughs enabling humans to explore far beyond our

own planet in recent decades speculating on the future of space exploration including space tourism and our possible future as an extraterrestrial species This is a must read for space buffs and everyone intrigued by the history and future of scientific discovery This oversize offering is a space nerd's dream come true Booklist

Yearbook on Space Policy 2014 Cenani Al-Ekabi, Blandina Baranes, Peter Hulsroij, Arne Lahcen, 2015-12-24 The Yearbook on Space Policy edited by the European Space Policy Institute ESPI is the reference publication analysing space policy developments Each year it presents issues and trends in space policy and the space sector as a whole Its scope is global and its perspective is European The Yearbook also links space policy with other policy areas It highlights specific events and issues and provides useful insights data and information on space activities The first part of the Yearbook sets out a comprehensive overview of the economic political technological and institutional trends that have affected space activities The second part of the Yearbook offers a more analytical perspective on the yearly ESPI theme and consists of external contributions written by professionals with diverse backgrounds and areas of expertise The third part of the Yearbook carries forward the character of the Yearbook as an archive of space activities The Yearbook is designed for government decision makers and agencies industry professionals as well as the service sectors researchers and scientists and the interested public

Meals to Come Warren James Belasco, 2006 Warren Belasco is a witty wonderfully observant guide to the hopes and fears that every era projects onto its culinary future This enlightening study reads like time travel for foodies Laura Shapiro author of *Something From the Oven* Reinventing Dinner in 1950s America In his insightful look at human imaginings about their food and its future sufficiency Warren Belasco makes use of everything from academic papers films and fiction to journalism advertising and world's fairs to trace a pattern of public concern over two centuries His wide ranging scholarship humbles all would be futurists by reminding us that ours is not the first generation nor is it likely to be the last to argue inconclusively about whether we can best feed the world with more spoons better manners or a larger pie Truly painless education a wonderful read Joan Dye Gussow author *This Organic Life* Warren Belasco serves up an intellectual feast brilliantly dissecting two centuries of expectations regarding the future of food and hunger *Meals to Come* provides an essential guide to thinking clearly about the worrisome question as to whether the world can ever be adequately and equitably fed Joseph J Corn co author of *Yesterday's Tomorrows* Past Visions of the American Future This astute sly warmly human critique of the basic belly issues that have absorbed and defined Americans politically socially and economically for the past 200 years is a knockout Warren Belasco's important book crammed with knowledge is absolutely necessary for an understanding of where we are now Betty Fussell author of *My Kitchen Wars*

Air & Space Smithsonian, 1998 **Technology and Culture**, 2000 **America's Ocean Wilderness** Gary Kroll, 2008 Examines a handful of famous ocean explorers and naturalists including Jacques Cousteau Thor Heyerdahl and Rachel Carson among others to demonstrate how their work helped shape the way many Americans would think about and interact with the ocean
