Kalina, 2017-04-07 The Educational Leader's Guide for School Scheduling Strategies Addressing Grades K 12 is the first publication to address creative scheduling at all levels K 5 or 6 K 8 middle and high schools This essential resource provides strategies for the effective and equitable distribution of available FTEs throughout the district while helping you work through the many critical questions and decisions involved in the scheduling process Based on the authors decades of experience in expressing the voice of classroom teachers and building administrators in the art of scheduling each chapter addresses key schedule development issues providing a step by step sequence multiple tables templates and example schedules Follow the models in this book to master the skills of producing an efficient organizational plan for your school *Teaching Foreign Languages in the Block* Deborah Blaz, 2013-11-20 Provides detailed instructional strategies sample lesson plans and sample assessments so that foreign language teachers can make the best use of the additional time 13497: LLL Mi Cuerpo (My Body) Spanish Teacher Guide Book , 2011-10-15 *Block Scheduling* Michael D. their use of instructional materials such as textbooks I drew on an analytical framework adapted from Stein Grover and Henningsen 1996 to assess various features of the lesson in order to note the interaction between the materials and the teachers decisions about how to use them I developed a lesson signature for each teacher a visual representation of the typical organization of the teacher s lessons and how materials were used within them My findings indicated that the teachers individual goals for their teaching beliefs about their students needs and interpretations of the district s curricular mandates interacted to steer their instructional choices to very different results Two of the teachers dutifully followed the textbook while two essentially disregarded it in favor of other materials Teachers own senses of their autonomy to make curricular decisions and their support for their students autonomy in learning math emerged as important factors I suggest implications for teacher professional development and curricular materials development
