Digital Technology and the Future of Broadcasting John V. Pavlik, 2015-07-16 This volume presents timely discussions on how digital technology is reshaping broadcasting and the media in the United States and around the world. It features contributions from distinguished scholars and young researchers representing work that spans domestic and international issues of technological change and the implications for broadcasting and related media in a global context. Among the many issues covered are: The impact of digital technology on the structure of broadcasting organizations and regulation; The nature of broadcast content or media programming and how it is delivered at home and abroad; Engagement and interaction of the public with broadcasting and social and mobile media; and The reshaping of revenue models for broadcasters and media organizations globally. The first two parts of the volume address research challenges, issues, and advances in global broadcasting; the third part focuses on international perspectives with chapters from broadcasting scholars and paper discussants at the Research Symposium. This section provides reflection on the problems and prospects for research, education, and public policy that arise in this era of rapid and continuing change. As a benchmark of the remarkable changes taking place in today's media environment, the volume sets an agenda for future research on the implications of digital technology for broadcasting and broadcasting education.

**Digital Resources for Learning** Daniel Churchill, 2017-02-08 This book addresses the theory and practice of using digital resources for contemporary learning and how such resources can be designed, developed, and employed in a variety of learning activities and with various devices. **Disruptive Leadership** Rich Kao, 2025-09-09 Companies worldwide are striving to transform their industries through innovative products and services. Becoming a disruptive organization, however, is easier said than done. Even more difficult is being a company that continually disrupts. Is it possible to discern a code for how companies can achieve this? In this highly readable and engaging book, a disruptive leadership framework is proposed in which caring deeply is placed at the center of the model. Apple is used as the leading example. By turning care into a focal point, a triphasic model is proposed that moves from the personal sphere (individual) to the corporate arena (organizational) and then to the global stage (impact). Nine key factors are identified along this path for how companies can achieve organizational excellence. This second edition updates all the facts, data, and history around Apple since the first edition and calls out how its revolution of care continues to not only validate its success but astound with its seemingly unfettered upside. Its ability to disrupt seems to have no limits, thus challenging business leaders present and future to incorporate the DNA of care as they build and scale businesses. In addition to the previously profiled companies

such as Nike IKEA 3M and Starbucks new case studies including Uniqlo Alibaba On Running 7 Eleven and Costco are presented to supplement Apple's story. Features: A new organizational model is given for interpreting Apple's success. Nine principles of organizational excellence are discerned from this new model. Promotes caring deeply as a focal point for approaching disruptive leadership. New corporate profiles include Uniqlo Alibaba On Running 7 Eleven and Costco. Application questions and assignments are included for each chapter making it an ideal training tool for leadership development and personal application.

**Sports Sponsorship and Branding** Ho Keat Leng, James J. Zhang, 2023-12-22 This book takes a close look at branding and sponsorship in sport in the age of digital media. It examines how branding and sponsorship have evolved in response to the challenges and opportunities of new technologies. Featuring the work of leading international sport business researchers from four continents and twelve countries, the book explores key contemporary topics including esports, name and image likeness, NIL rights, viewer experience, machine learning, social media use by athletes, sport migration, and the impact of COVID 19. It presents cutting edge cases and new data across sports and events including the Olympics, the NBA, international football, the rafting world championships, and collegiate sports. The book is an essential resource for advanced students, researchers, practitioners, and policymakers working in sport business and management. **The Political Economy Reader** Naazneen H. Barma, Steven K. Vogel, 2021-08-29 The Political Economy Reader advocates a particular approach to the study of political economy: the market institutional perspective, which emphasizes the ways in which markets are embedded in political and social institutions. This perspective offers a compelling alternative to the market liberal view, which advocates freer markets and less government intervention in the economy, as if states and markets were naturally at odds with each other. The reader embraces a truly interdisciplinary approach to the study of political economy with extensive coverage from sociology, economics, history, and political science. It includes some of the most important classical and contemporary theoretical perspectives on political economy. And it engages some of the most topical debates in political economy today, such as climate change, the global financial crisis, inequality, the digital platform economy, and the COVID 19 pandemic. For political economy courses at a variety of levels and from a range of disciplines, the reader is also of interest to scholars and citizens wanting perspective on the intersection of economics, politics, and society. New to the Second Edition: More than 20 new readings included by such notables as Elinor Ostrom, E. J. Hobsbawm, Dani Rodrik, Amartya Sen, Thomas Piketty, and Mariana Mazzucato among many others. Fully updated introductions to the book and each thematic chapter of readings. Coverage of key emerging debates including climate change, the financial crisis, inequality, the digital platform economy, and COVID 19.
