Return on Strategy Michael Moesgaard, Morten Froholdt, Flemming Poulfelt, 2009-12-04 Why is it that many companies meticulously following recipes on management and strategy fail Did Google Skype Ryanair Huawei and a number of other successful companies buy into a well thought out strategy and adhered to that over time How do companies deliberately opting out of the recipe game and opting into the out of the box thinking fare In short why is it that some companies achieve a higher Return on Strategy than others Whereas Return on Investment RoI has attracted increased attention over the last couple of decades little if any attention is being paid to whether companies do at all achieve Return on Strategy RoS and how This book provides an overview of contemporary strategy literature and recipes brushed up with a view to identifying explanations as to how recipes has seldom worked as intended One out of several reasons rests on the fact that recipes do not take the so called X factor into account With the X factor as the starting point the book examines a sample of 50 global companies of which some has achieved a remarkable high Return on Strategy and others failed The 50 companies covers most continents as some are from the North America some are from the European continent and others are from different parts of the emerging Asian region threatening companies from the Western hemisphere The book explains the reason behind success and failures and provides practical tools as to how companies may increase their Return on Strategy In the toolbox you will find a framework on how to increase the Return on Strategy as well a number of dynamic positioning tools road maps and bearing points Invariably more and more companies including consultants business leaders and MBAs now work diligently in order to increase their Return on Strategy and the best of them are here to stay successfully are you

tech writer Ben Tarnoff offers an answer The internet is broken he argues because it is owned by private firms and run for profit Google annihilates your privacy and Facebook amplifies right wing propaganda because it is profitable to do so But the internet wasn't always like this it had to be remade for the purposes of profit maximization through a years long process of privatization that turned a small research network into a powerhouse of global capitalism Tarnoff tells the story of the privatization that made the modern internet and which set in motion the crises that consume it today The solution to those crises is straightforward deprivatize the internet Deprivatization aims at creating an internet where people and not profit rule It calls for shrinking the space of the market and diminishing the power of the profit motive It calls for abolishing the walled gardens of Google Facebook and the other giants that dominate our digital lives and developing publicly and cooperatively owned alternatives that encode real democratic control To build a better internet we need to change how it is owned and organized Not with an eye towards making markets work better but towards making them less dominant Not in order to create a more competitive or more rule bound version of privatization but to overturn it Otherwise a small number of executives and investors will continue to make choices on everyone's behalf and these choices will remain tightly bound by the demands of the market It's time to demand an internet by and for the people now
