New kinds of news producers and novel means of distributing, sharing and using news align with alternative ways of understanding what news is. Based on an extensive ethnography of news practices and perceptions among a broad range of young adults in Sweden, this book discusses how the rapid digitisation of news has shaped young people's understanding of it, as well as how news is made, relevant, trusted and used in the temporalities and spatialities of everyday life. This cutting-edge volume analyses the blurring boundaries between news and social media, facts and stories, highlighting how new media categories such as influencers and memes can take on the status of news for young audiences and shape their understanding of themselves and the world.
