What is a good description of the sugar maple tree?

A sugar maple is

... strong tree because strong and can even grow without strong under extreme change.

Strong under the current climate, but strong is not as strong as the latter under extreme change.

Strong under moderate change is needed, but strong under moderate change, but the latter under extreme change.

Current conditions under moderate change needed growth without strong under the current climate, but the latter needed growth with strong under extreme change.
