[How to Save the Internet](#) Nick Clegg,2025-09-04

A wake up call we cannot afford to ignore TONY BLAIR A vital read for anyone building or regulating the next era of technology REID HOFFMAN The global open internet is fragmenting As democracies seek to rein in the power of Big Tech as Silicon Valley pivots to an America first agenda as authoritarian regimes such as China and Russia segregate their populations from the rest of the internet the most powerful tool ever created for bringing the world together risks being dismantled Taking us behind the scenes at Meta and his interactions with world leaders Nick Clegg Meta s former President Global Affairs sets out where Big Tech has gone wrong how Silicon Valley s insularity has blinded it to its missteps and the radical reforms of the global platforms that are now needed if they are to secure a long term future But he also makes the case that many of the

charges against them including that their algorithms polarise manipulate and harm are vastly overstated or simply untrue And while new laws that regulate these corporations are essential imposing national borders on the internet cannot be the answer That will fatally undermine its capacity for knowledge sharing collaboration education trade medical and scientific research and ultimately for the improvement and empowerment of billions of lives Radical reasonable deeply felt and dismally honest How To Save the Internet sets out a blueprint for the global cooperation we need in order to reform Big Tech while preserving the fundamental openness of the internet on which our future so depends A gripping and timely book
