AI and Civic Engagement Torrey Trust, Robert W. Maloy, 2025-11-25 Integrate generative AI technologies into your teaching with activities and prompts designed to engage students in civic learning to become adaptable critical thinkers in a time of ongoing change. Many students have become disinterested and disengaged from politics and what's happening in their communities. To ignite interest and activate engagement in civics, students need to learn how to analyze current events, make informed decisions, think and act democratically and participate locally, nationally and globally as engaged citizens. Generative AI GenAI technologies which are transforming every aspect of modern life can support and enrich civic learning in ways that were never before possible. With this practical guide, you'll discover how to integrate GenAI technologies into civic learning across all grade levels and in many different subject areas including math, English language arts, engineering, science, computer science, history, social studies, music and art. This book features 28 learning plans that connect with the ISTE Student Standards, each with multiple interactive activities and example prompts to support students in engaging with GenAI tools as active citizens and critical investigators of the capacities and risks of these technologies. The book offers more than 75 interactive activities and 90 example GenAI prompts to foster meaningful, exciting and engaged learning. Shows how to teach with and about GenAI technologies to enhance civic learning. Explores dozens of educational and public policy issues that students will find relevant to their lives and futures. Expands student learning about diversity and inclusion in every chapter. Integrates GenAI into activities in ways that support and extend, not replace, teaching and learning. As students and teachers begin using GenAI tools to learn about civic issues and public policy topics that matter to them, they become more informed civic learners and more knowledgeable technology users. This book is devoted to making that crucial teaching and learning happen. Audience: Elementary and secondary teachers across various disciplines including social studies, STEM fields and the English language arts.

Staying Human in an Era of Artificial Intelligence Joseph Vukov, 2024-06-20 AI poses a real and present danger. It contains the capacity to amplify social problems, drive a wedge further into our already polarized society, and sow seeds of distrust in communities and personal relationships. When approached without a robust sense of human dignity, AI also threatens to undermine our self-understanding. To a degree beyond any previous technology, AI can make us forget ourselves. In this new era of AI, we must consciously make a choice to stay human. In this book, I provide a map and the tools for doing just that. From the author, Joseph Vukov.

UX Writing Jason C.K. Tham, Tharon Howard, Gustav Verhulsdonck, 2023-10-02 This flexible textbook provides an integrated approach to user experience UX writing and equips students and practitioners with the essential principles and methods to succeed in writing for UX. The fundamental goal of UX writing is to produce usable and attractive content that boosts user engagement and business growth. This book teaches writers how to create content that helps users perform desired tasks while serving business needs. It is informed by user-centered design, content strategy, artificial intelligence AI, and digital marketing communication methodologies along with UX.

related practices By combining writing as design and design as writing the book offers a new perspective for technical communication education where UX design and writing are merged to achieve effective and desirable outcomes Outlining the key principles and theories for writing user centered content design this core textbook is fundamental reading for students and early career practitioners in UX technical communication digital marketing and other areas of professional writing

AI for Beginners 101 M. Morrison,2025-10-02 AI for Beginners 101 Finally an AI Guide That Actually Makes Sense Master AI in Minutes Not Months Even If You Can Barely Program Your Coffee Maker Stop feeling left behind while everyone else seems to get AI You keep hearing about artificial intelligence everywhere your friends are using it your coworkers are talking about it and your kids probably know more about it than you do Meanwhile you're stuck wondering Where do I even start Here's the truth You don't need a computer science degree to unlock AI's incredible potential You just need someone to explain it like you're a real person not a robot Why This Book Exists And Why You Need It Most AI books are written by tech bros for tech bros They're packed with confusing jargon assume you know things you don't and make you feel dumber with every page AI for Beginners 101 is different It's written for the rest of us the people who want to understand AI without enrolling in MIT What You'll Actually Learn In Plain English The Smartphone Test If you can text your kids you can master AI tools 30 Second AI Wins Quick applications that save you hours immediately The Anti Jargon Approach Complex concepts explained like you're talking to a friend Real People Real Results How teachers entrepreneurs and retirees are using AI to level up their lives Future Proof Your Skills Stay relevant without becoming a tech expert Here's What Makes This Different No Coding Required Seriously If you can use Instagram you can use AI Results in Minutes Start seeing benefits before you finish your first coffee Written Like a Human No technical mumbo jumbo just clear friendly guidance Tool Recommendations Specific apps and platforms you can use today Confidence Building Go from AI anxious to AI awesome step by step The Bottom Line While everyone else is either intimidated by AI or drowning in technical manuals you'll be the person who actually gets it and uses it effectively AI isn't going away Your choice isn't whether to learn it it's whether to learn it the hard way or the smart way Ready to join the AI confident crowd Scroll up and grab your copy now Your future self will thank you P.S. This book has already helped thousands of non-techie people feel confident with AI You're next [We Can Teach That](#) Ewa Dziedzic-Elliott,2024-11-28 Information literacy is a complex subject that finally arrived at the doorstep of school libraries For decades academic researchers have been trying to capture the essence of information literacy its educational cognitive and civic value The collection of book chapters offered in We Can Teach That is a handbook that can be used as an inspiration for teaching various types of literacy visual digital multicultural health and more The book asks important questions When do we start teaching information literacy How do we teach it How does it affect our students at their education level How does it prepare them for their post high school adult life Does it impact their transition to college or career Dziedzic Elliott and her collaborators provide a range of best practices and concepts that inspire thinking about

teaching information literacy at all levels Although written with school librarians in mind the book can be easily adapted by teachers school administrators and even public librarians who are looking to incorporate information literacy elements in their daily practices The book challenges the reader to rethink what they know about digital or tech literacy breaks some stereotypical concepts about multicultural literacy and highlights the importance of literacies even in adulthood **PC AI.**
